Dynamic inspection UI

Implementation snapshots and review evidence

15 October 2026
Three draft PRs targeting simplified-ui-redesign. No PRs merged.

50 actual simulator screenshots. Pages 2-35 retain the original 34 checkpoint captures; pages 36-51 show the new inputs, navigation, transitions and combined preview. Earlier checkpoints are labeled so they can be compared with the completed flow.

Original design

Pages 2-35: baseline, focused test, queue, review and photos.

↓

PR #87 - inputs

Pages 36-42: larger controls, notes, measurements and photo previews.

↓

PR #88 - navigation

Pages 43-45: queue continuity and larger review correction cards.

↓

PR #89 - transitions

Pages 46-48: confirmed next test, reduced motion and save failure.

↓

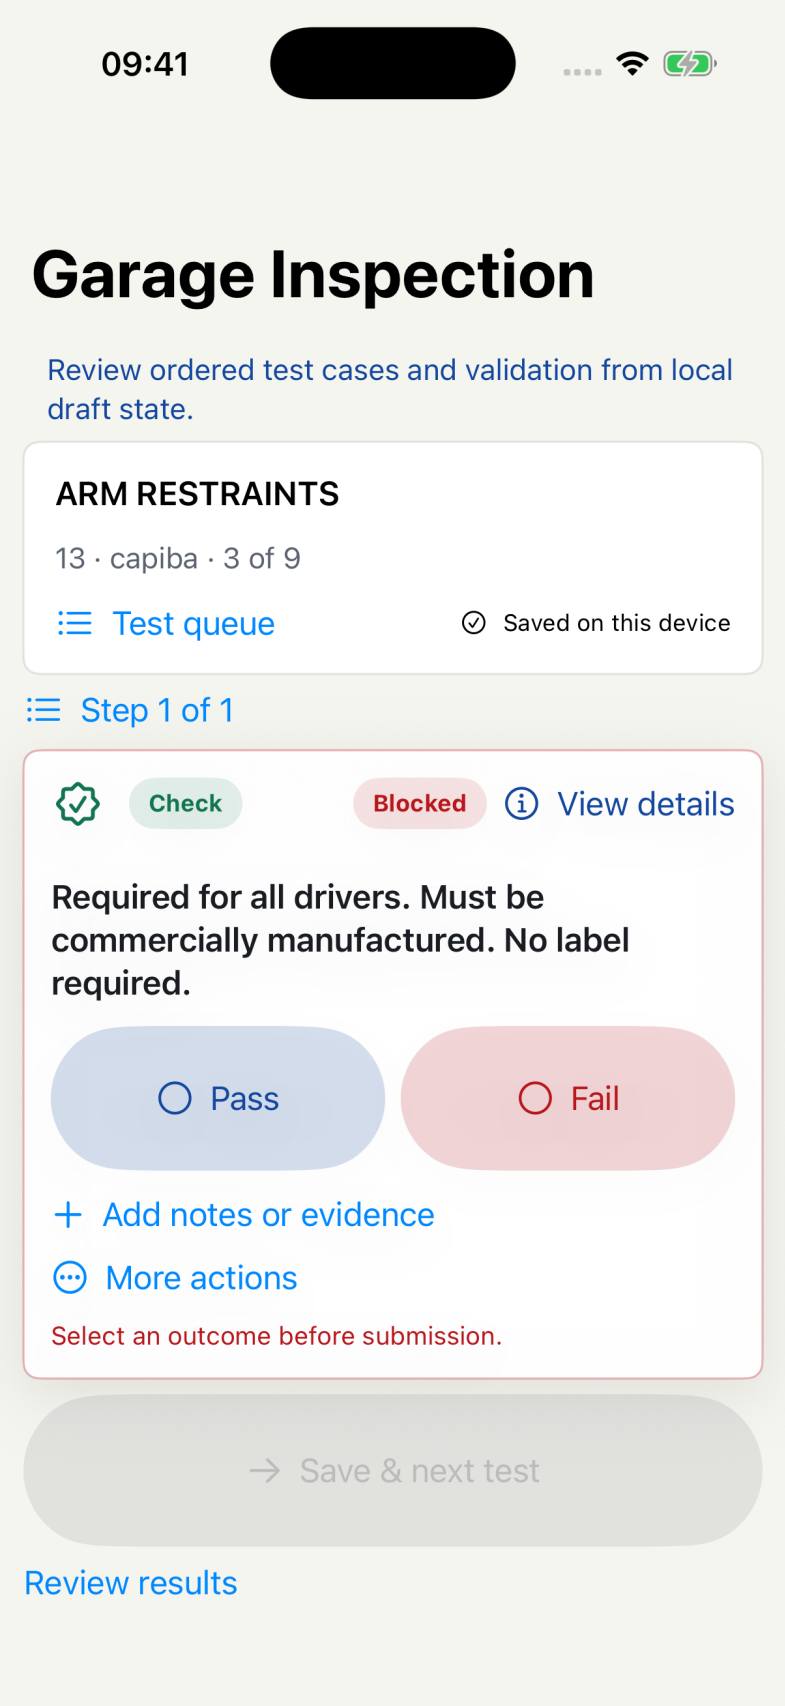

Combined preview

Pages 49-51: final input, keyboard editor and restored review.

Combined validation: 143 tests / 146 executed cases passed; Release build passed. See page 52 for source commits and review limits. The original 36-page PDF remains unchanged.

Current focus

01-current-focus.png | 9832364

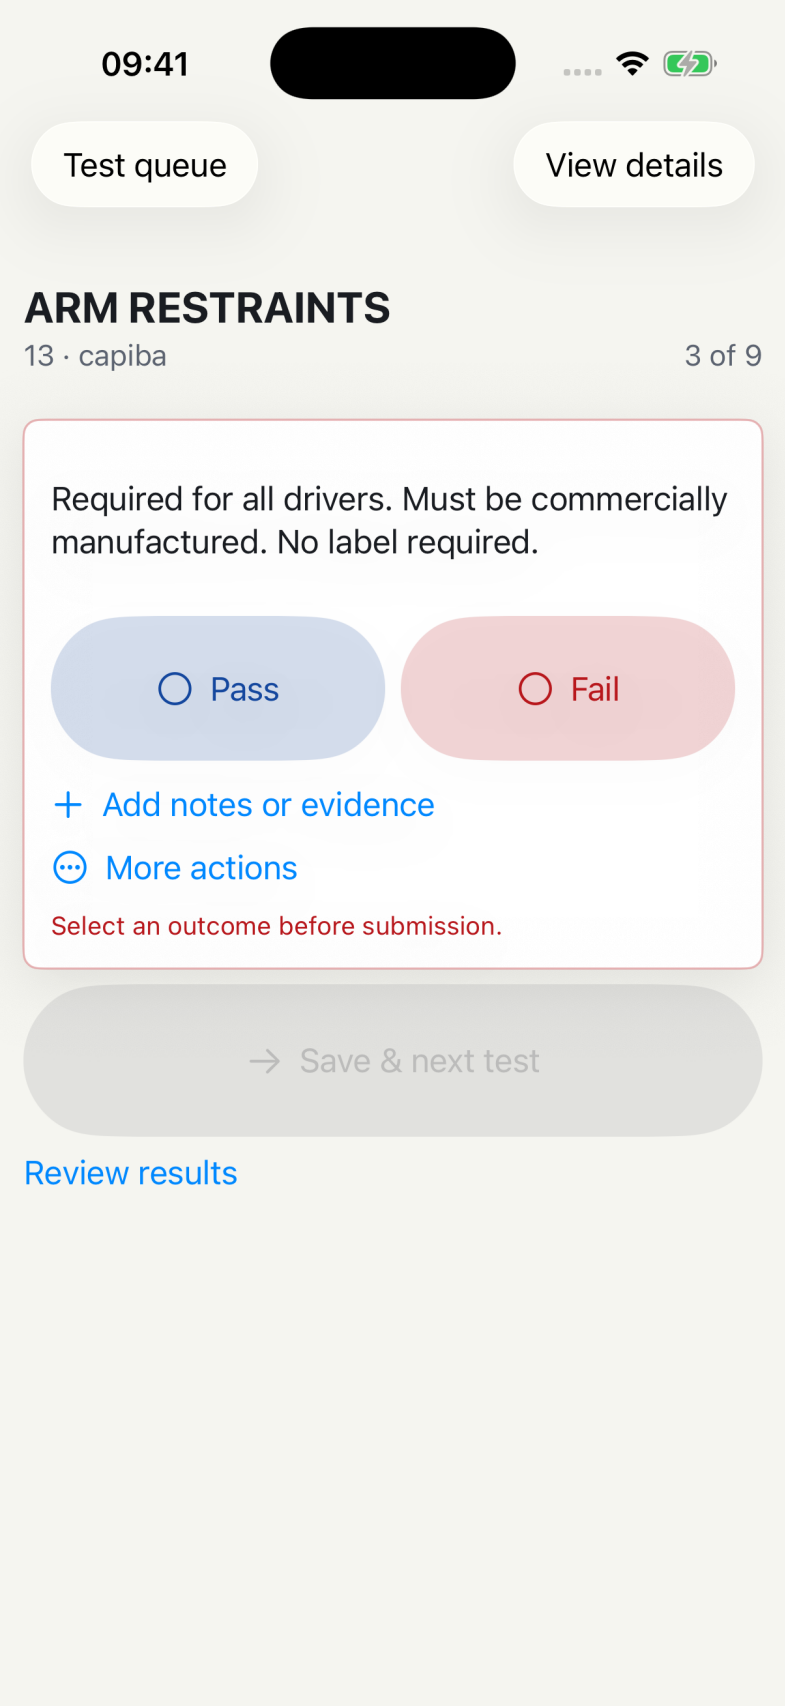

Original stacked execution screen before replacing context, result controls, and secondary links.

Original: focus context and details

Focus context

01-focus-context.png | 9f62aac

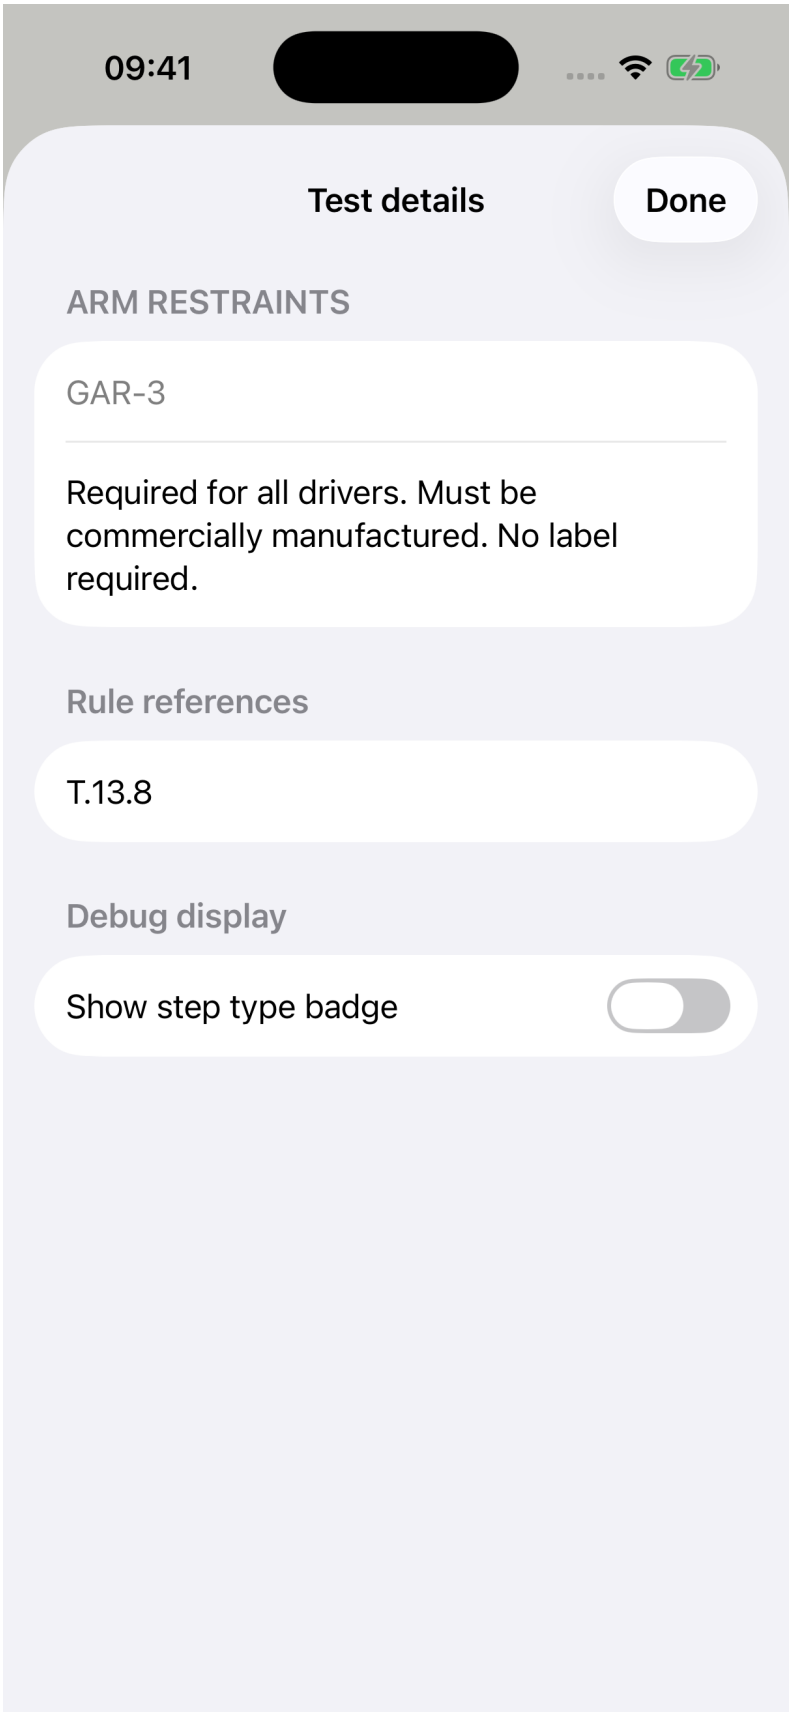

labeled queue and details toolbar, quiet vehicle/progress, single-step navigation removed.

Original: focus context and details

Details

02-details.png | 9f62aac

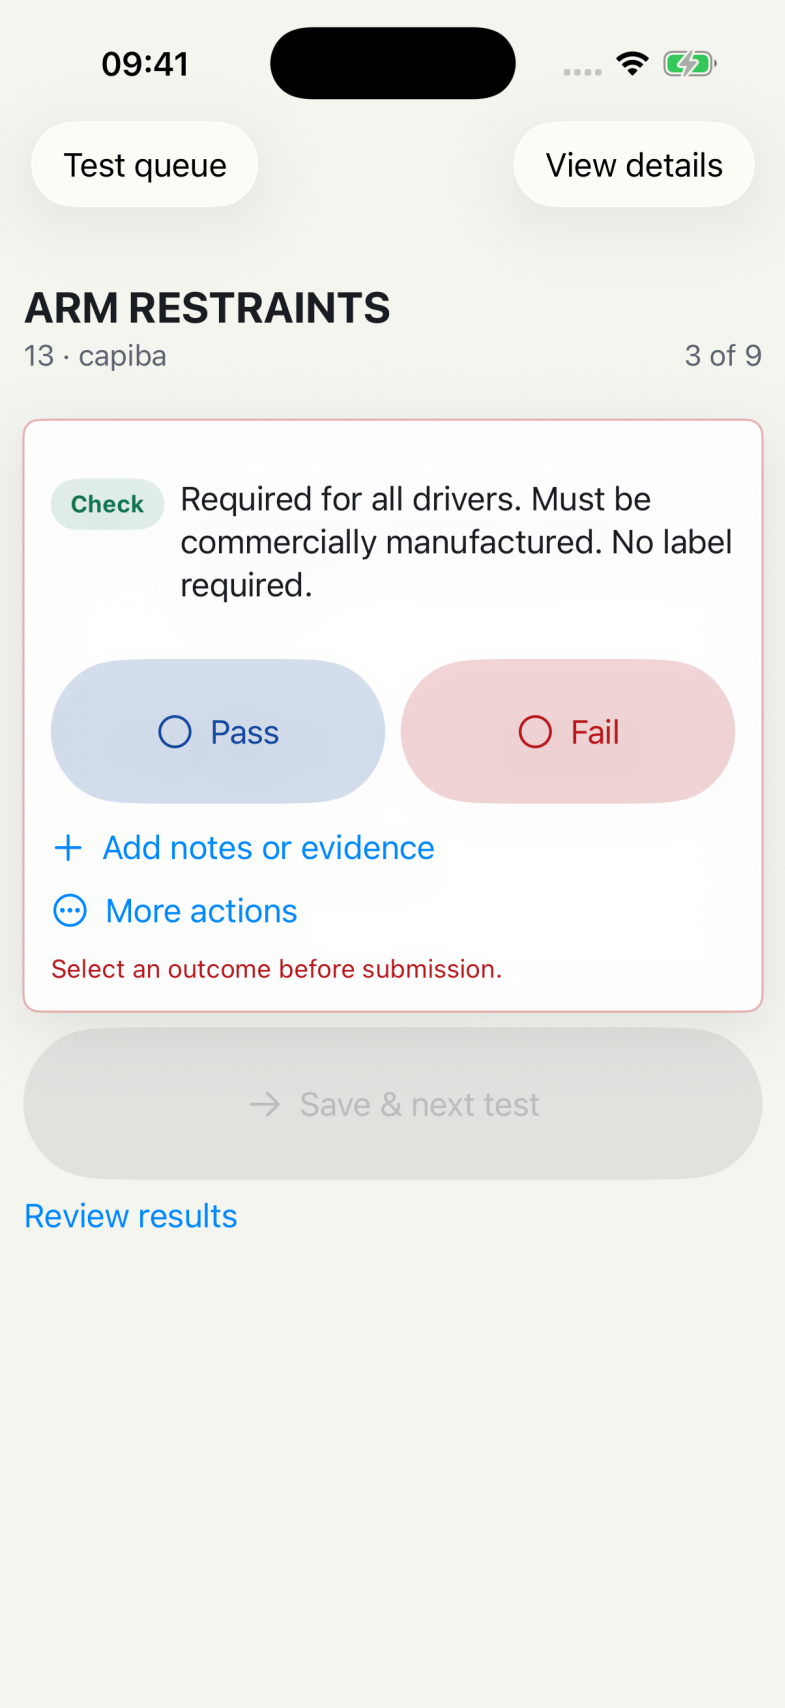

full criteria and reference sheet with explicit Done action.

Original: focus context and details

Debug badge

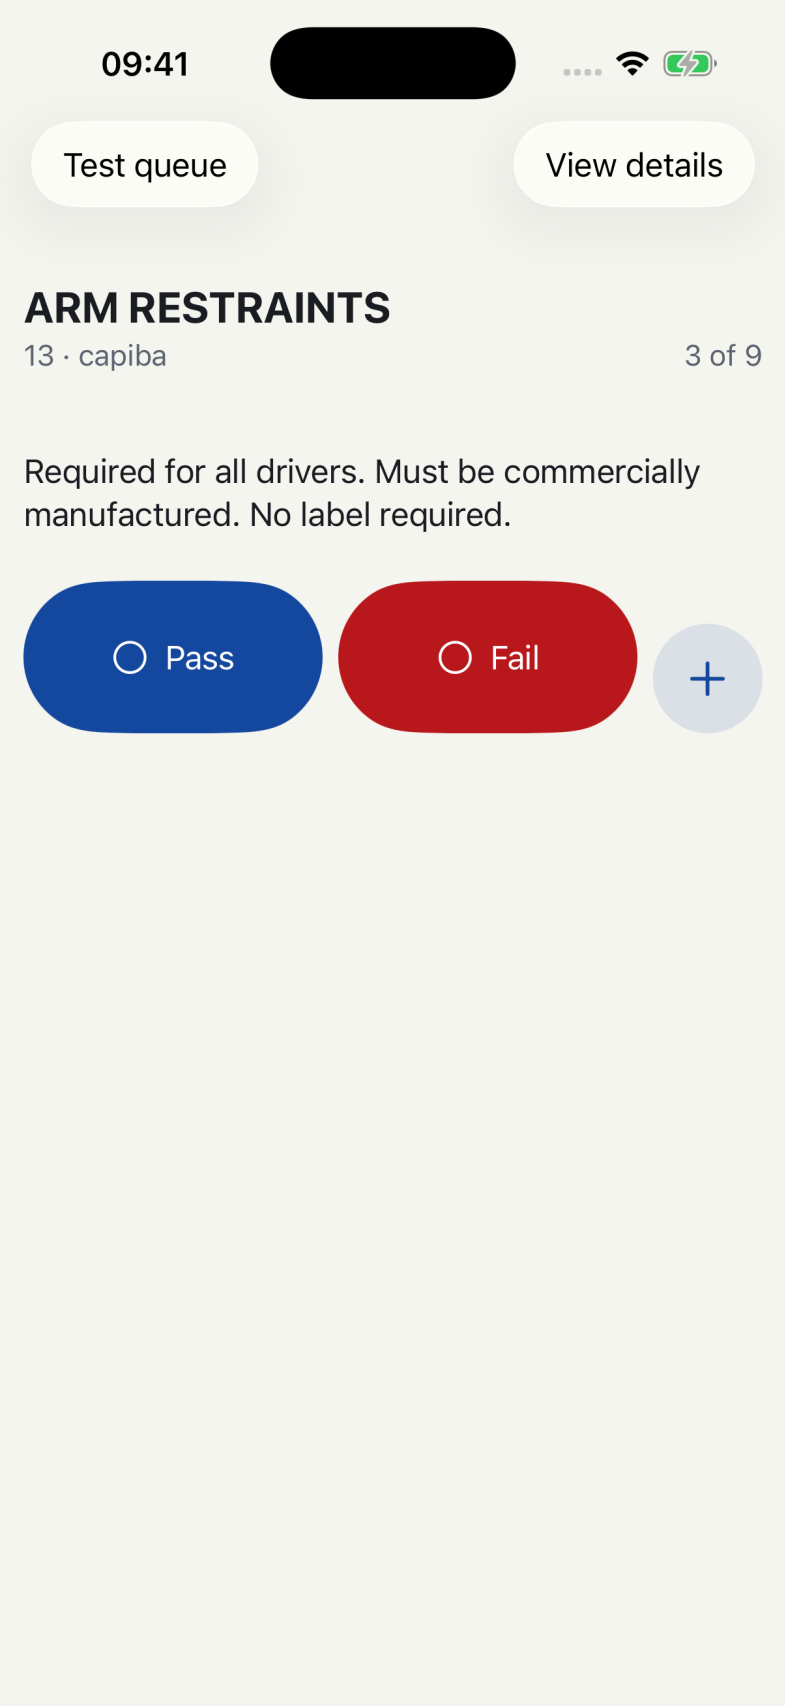

03-debug-badge.png | 9f62aac

optional type badge to the left of the description.

Input

01-input.png | d0ad464

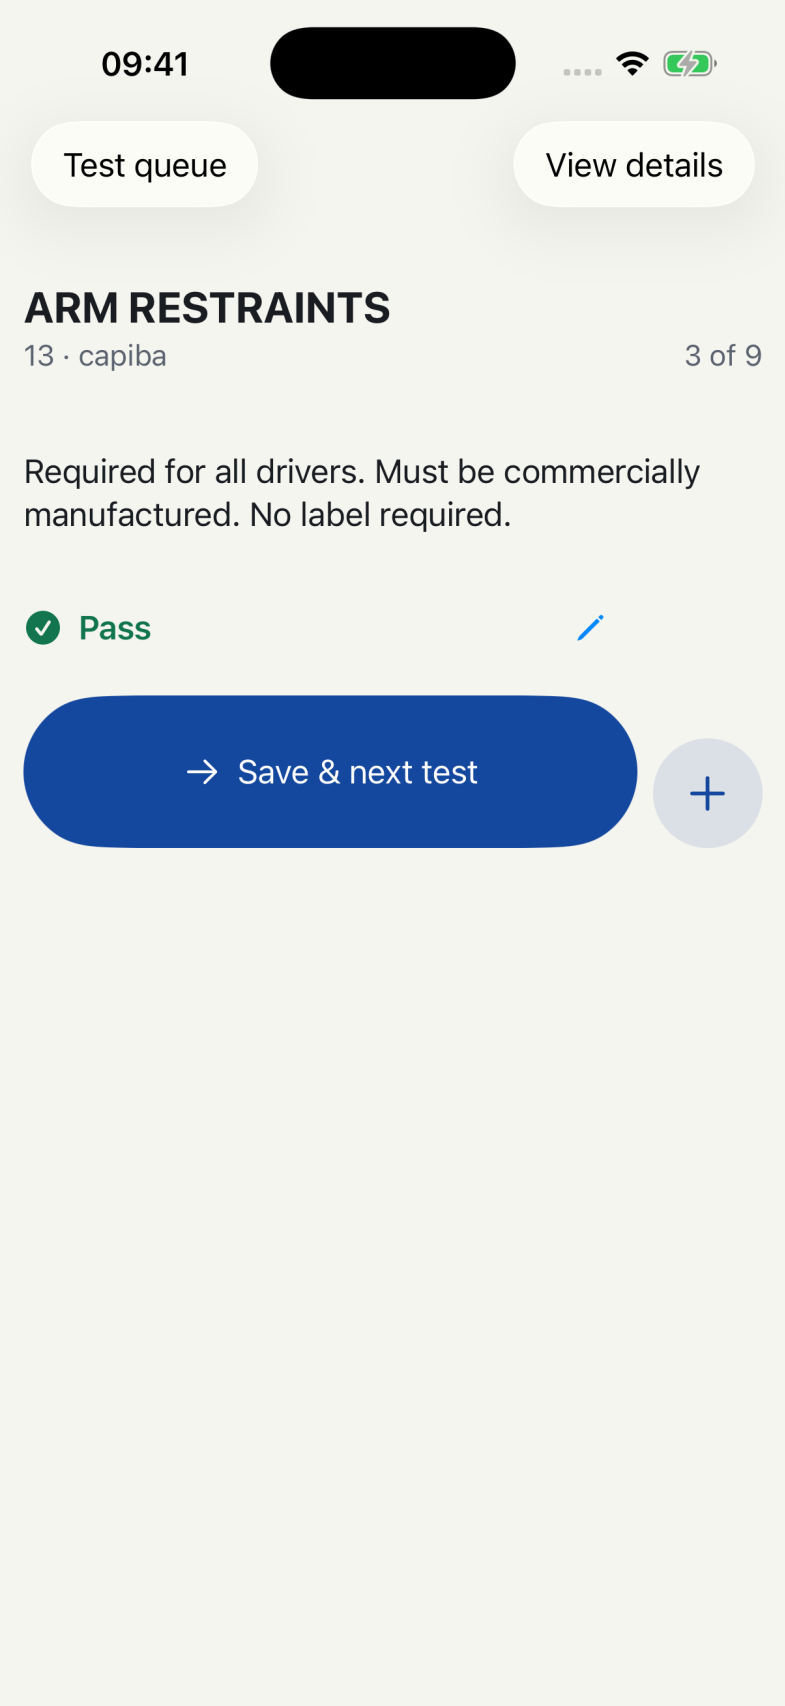

Neutral required outcome input; no initial error or disabled Save button.

Original: result input and additions

Ready

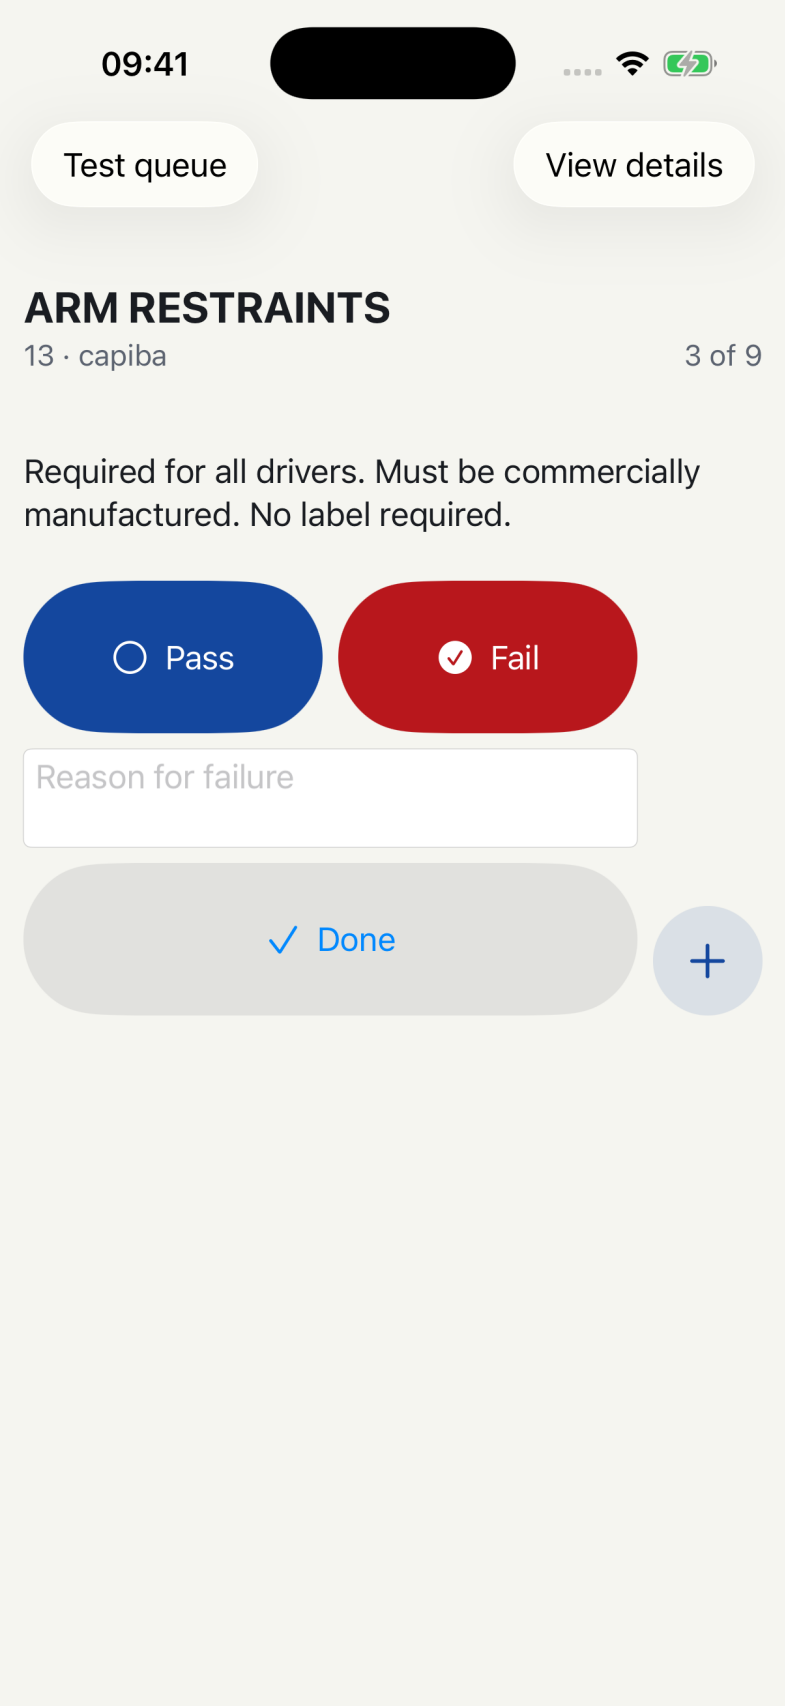

02-ready.png | d0ad464

Pass selected: summary/edit path and Save & next replace input controls.

Required notes

03-required-notes.png | d0ad464

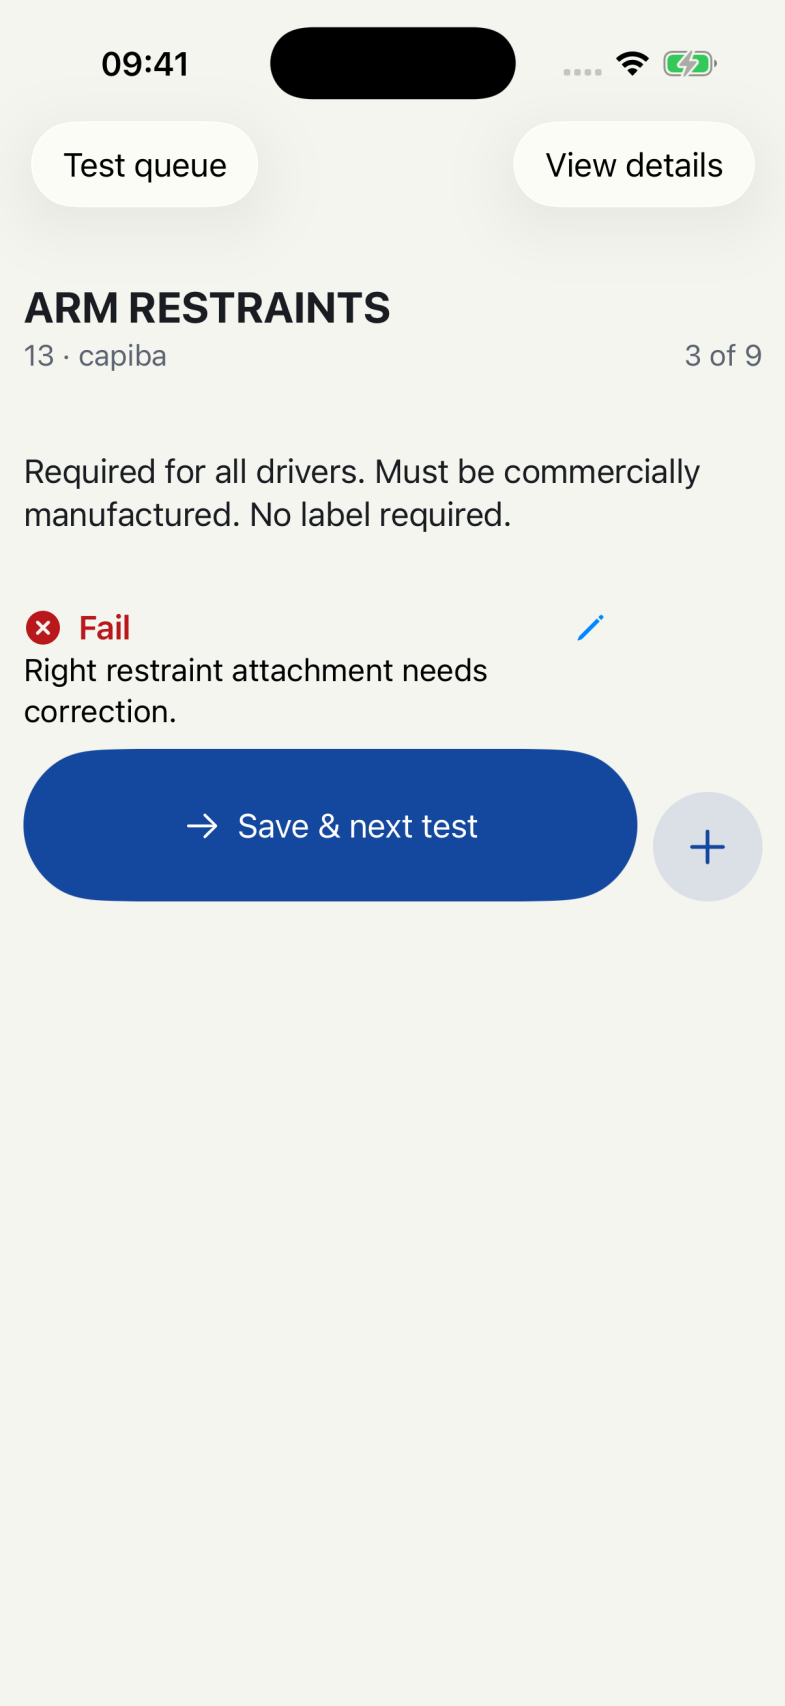

Fail reveals the required reason field before confirmation.

Original: result input and additions

Fail ready

04-fail-ready.png | d0ad464

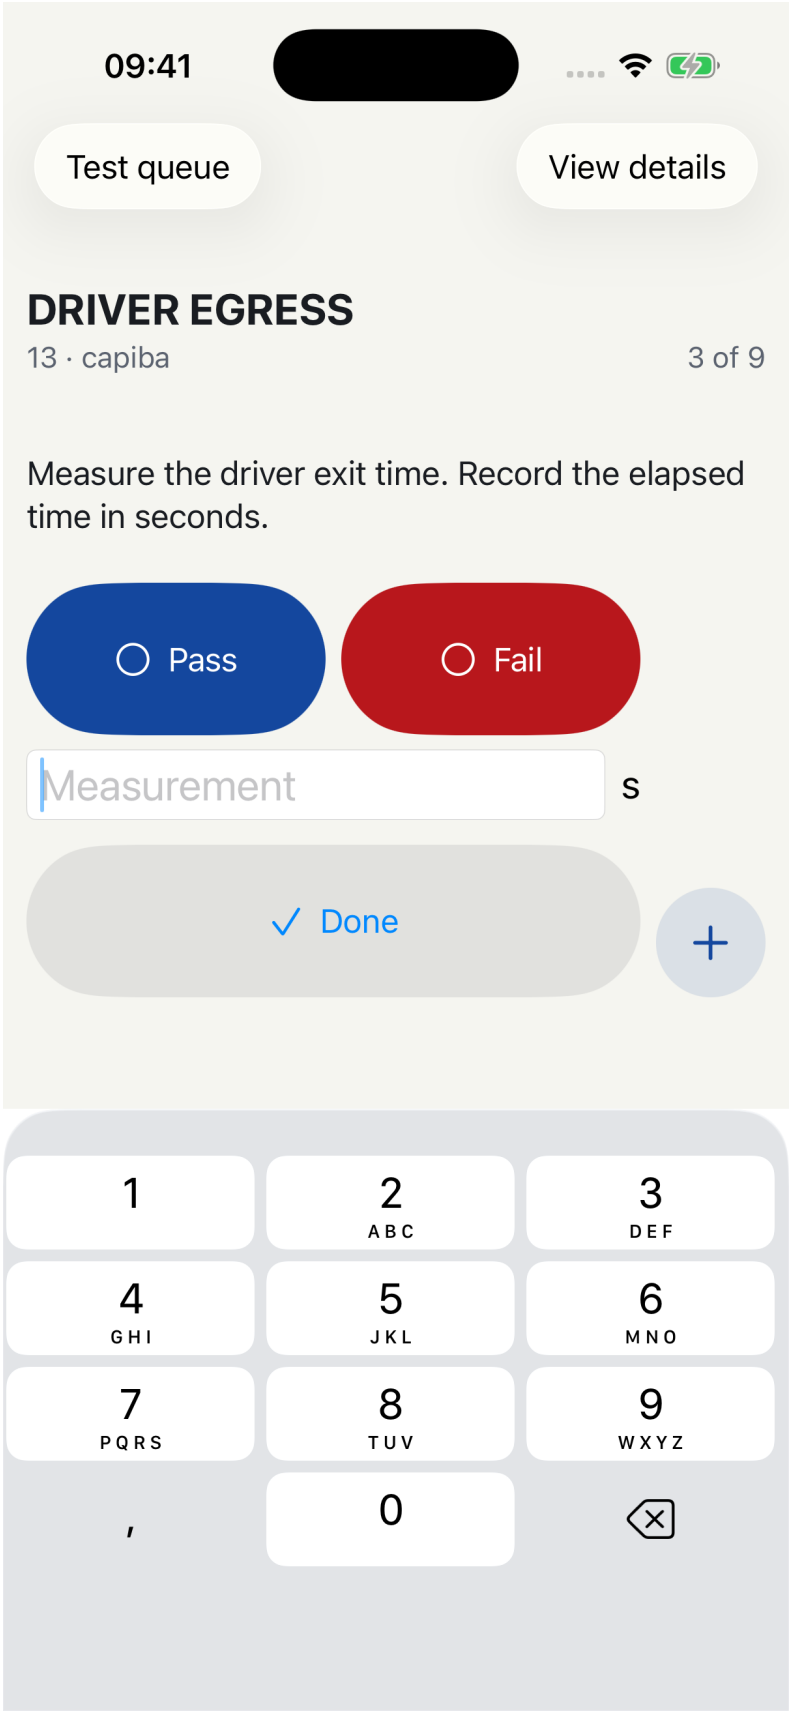

Failure reason retained beside the recorded outcome.

Original: result input and additions

Measurement keyboard

05-measurement-keyboard.png | d0ad464

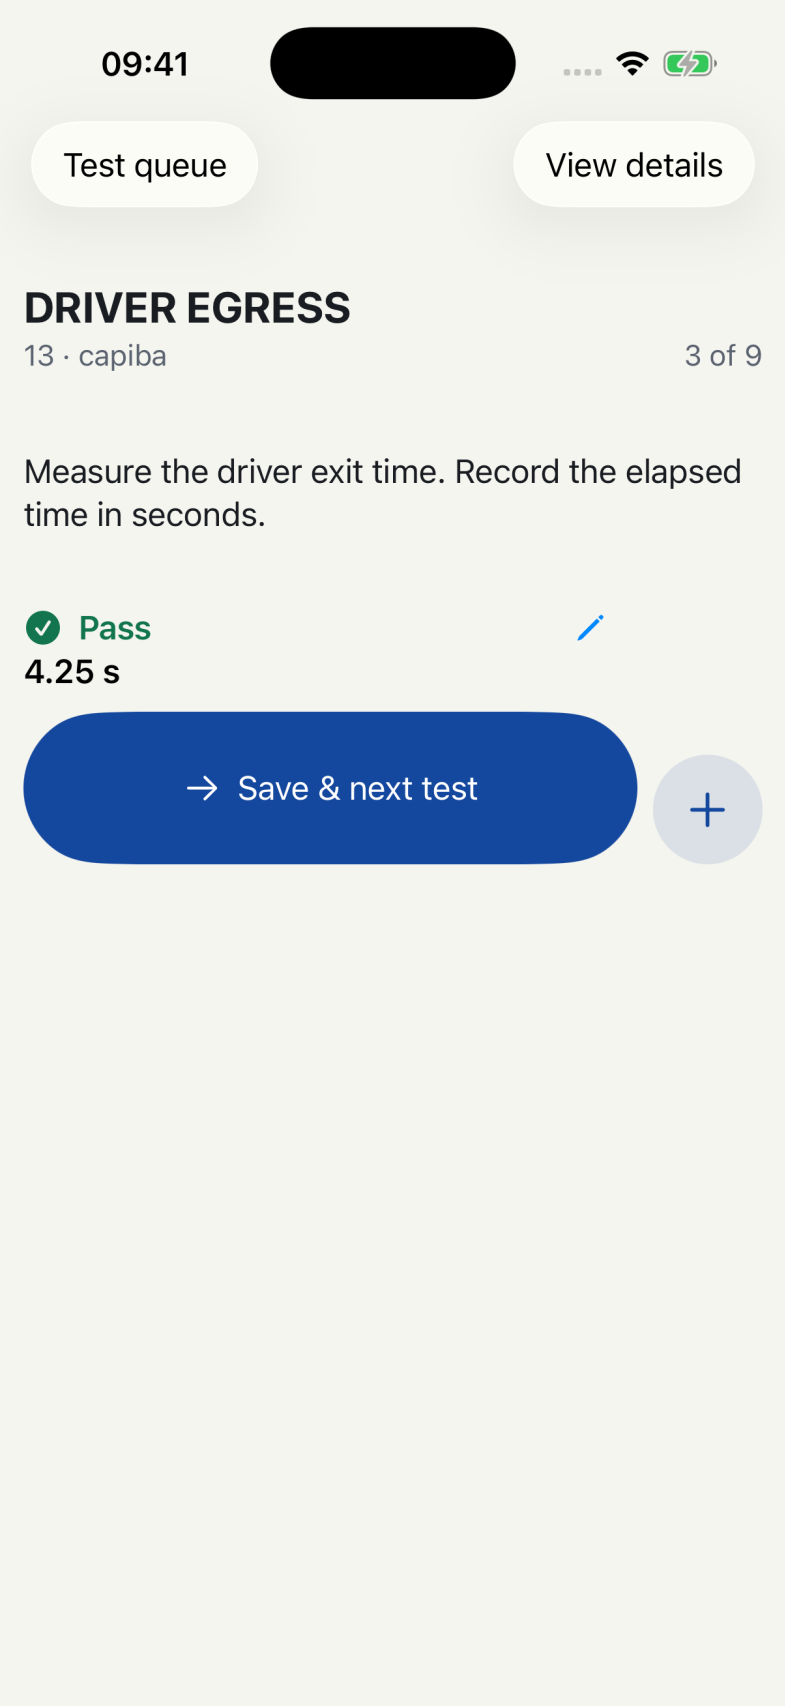

Required measurement, unit, decimal keyboard, and one visible Done action.

Original: result input and additions

Measurement ready

06-measurement-ready.png | d0ad464

Valid measurement becomes a concise result summary.

Photo input

07-photo-input.png | d0ad464

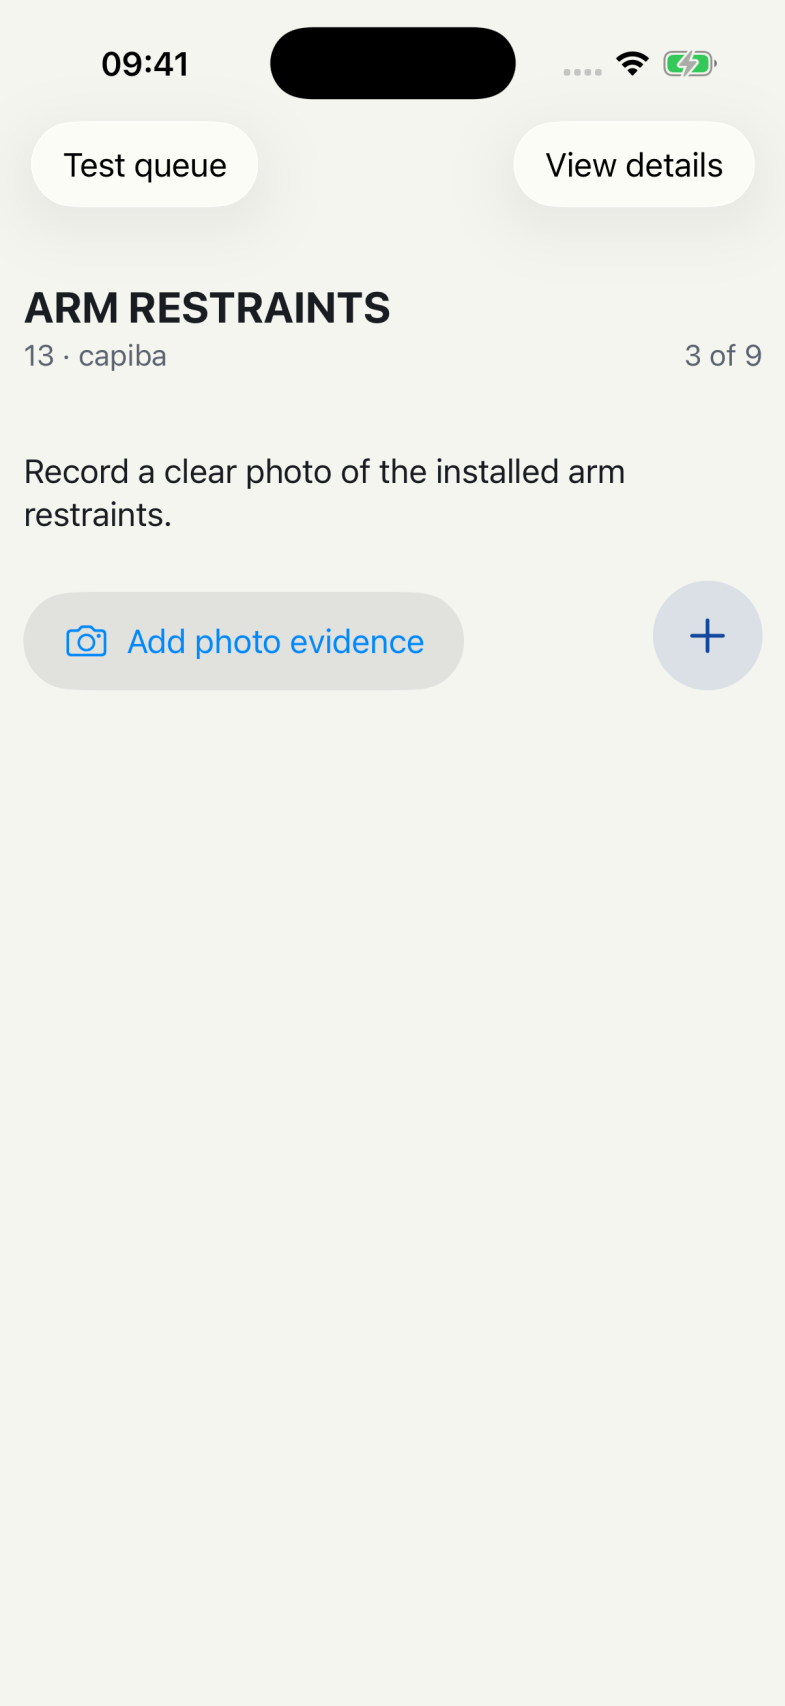

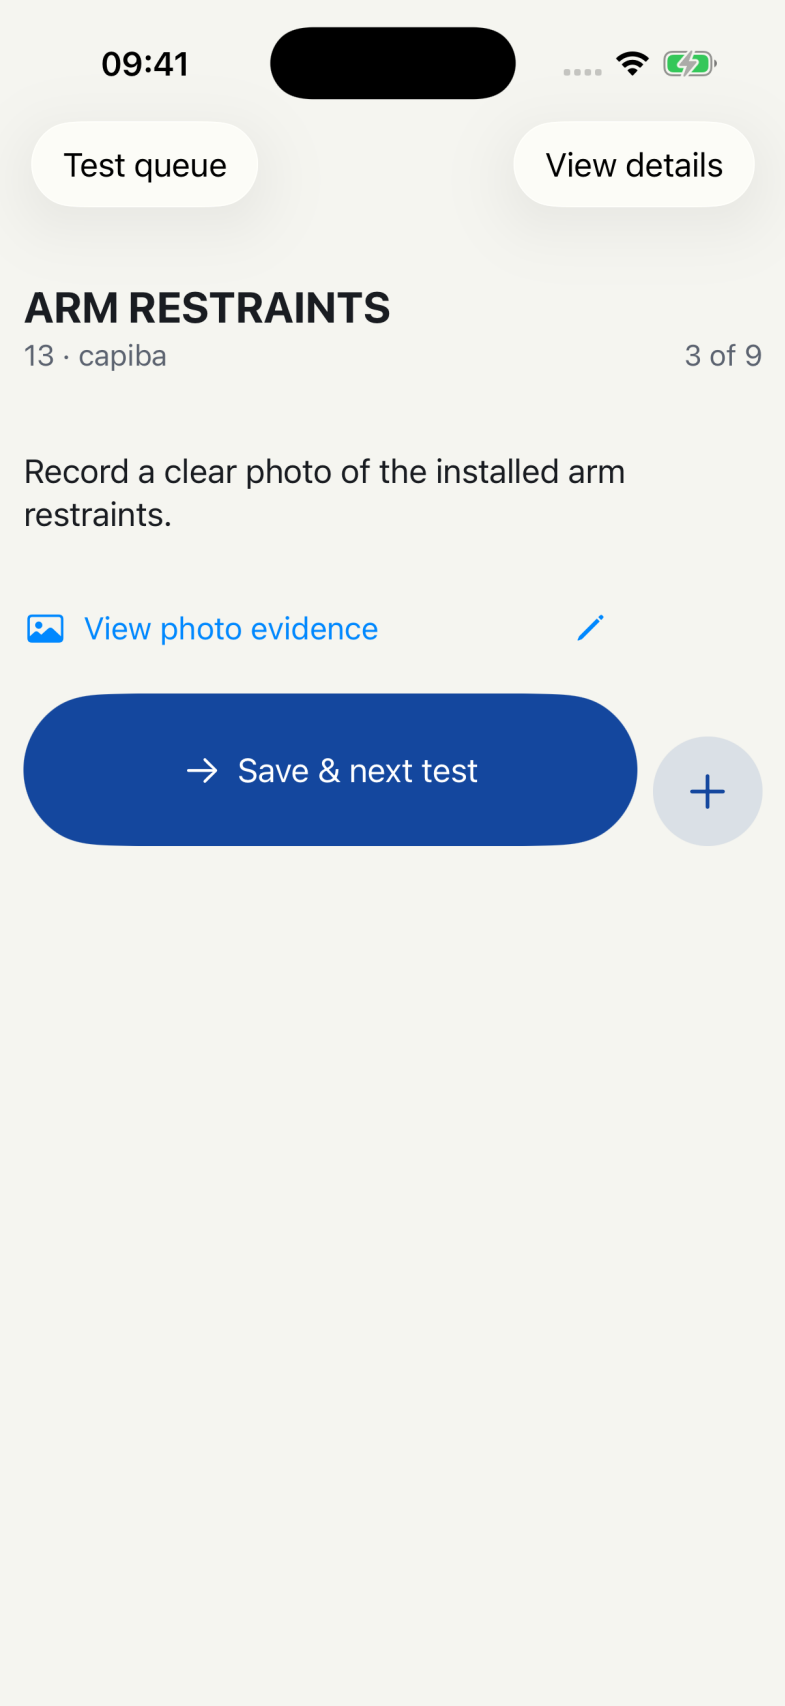

Photo-only schema shows required photo input without artificial Pass/Fail.

Photo ready

08-photo-ready.png | d0ad464

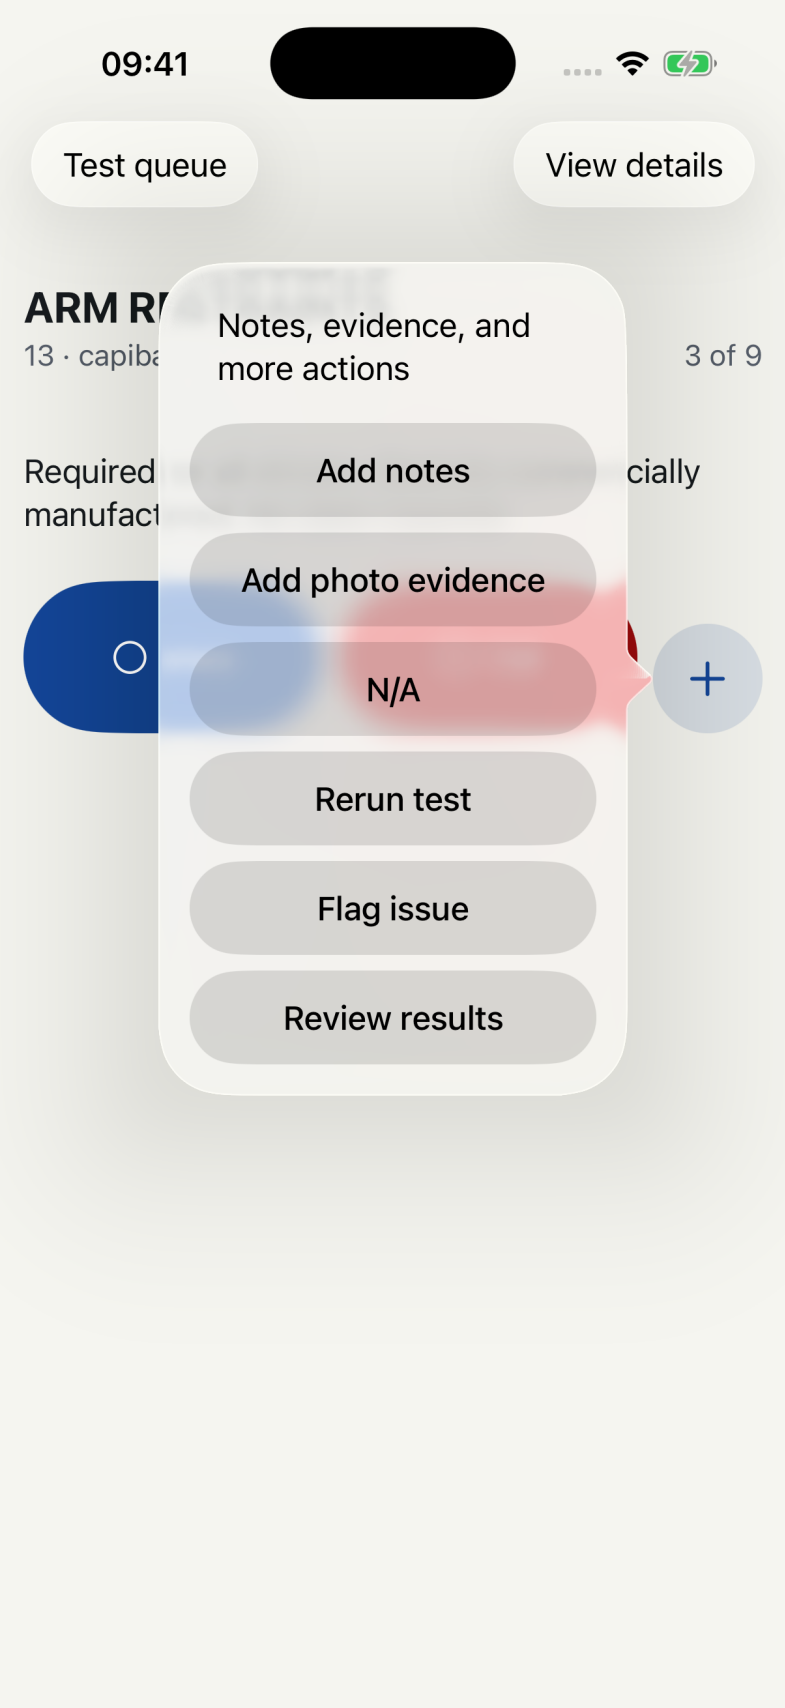

Actual persisted fixture image enables photo preview and confirmation.

Original: result input and additions

Plus menu

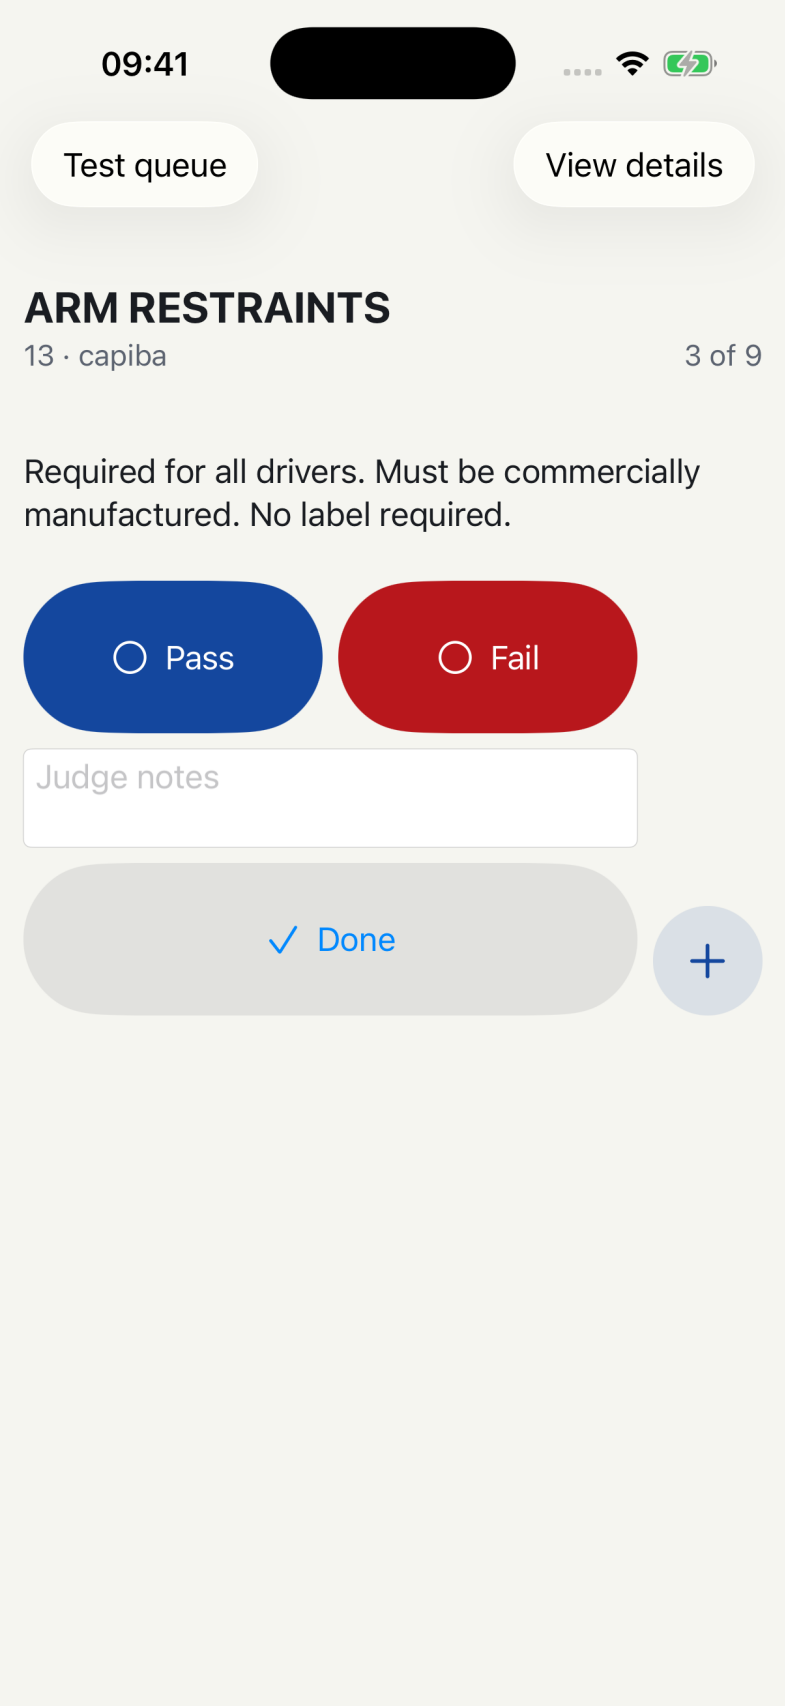

09-plus-menu.png | d0ad464

Native secondary menu combines notes, photos, N/A, rerun, flag, and review.

Optional notes

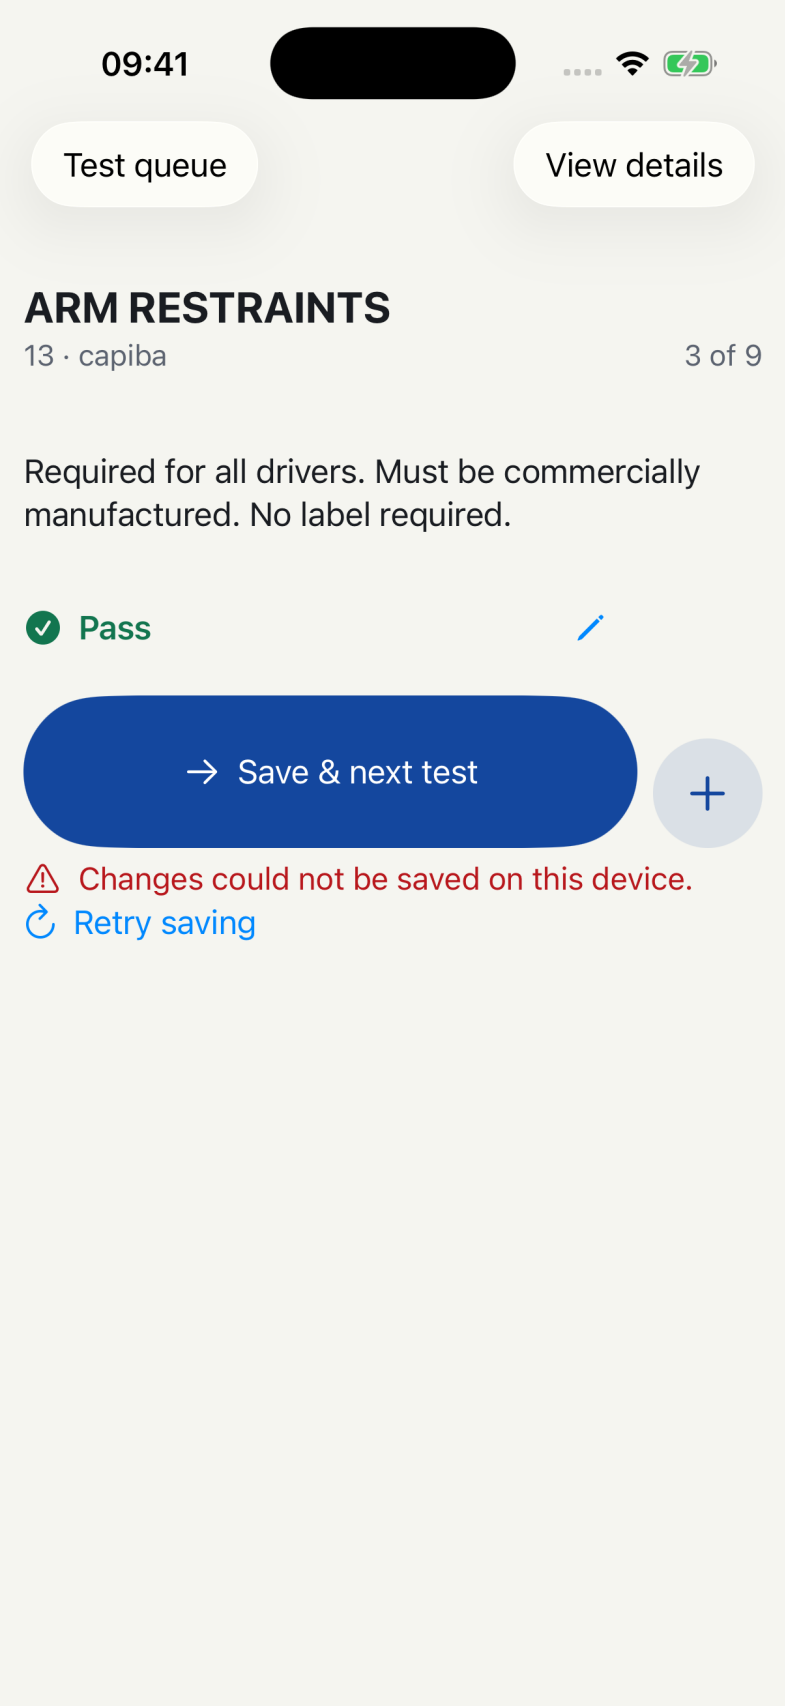

10-optional-notes.png | d0ad464

Optional notes appear only after requested.

Save failure

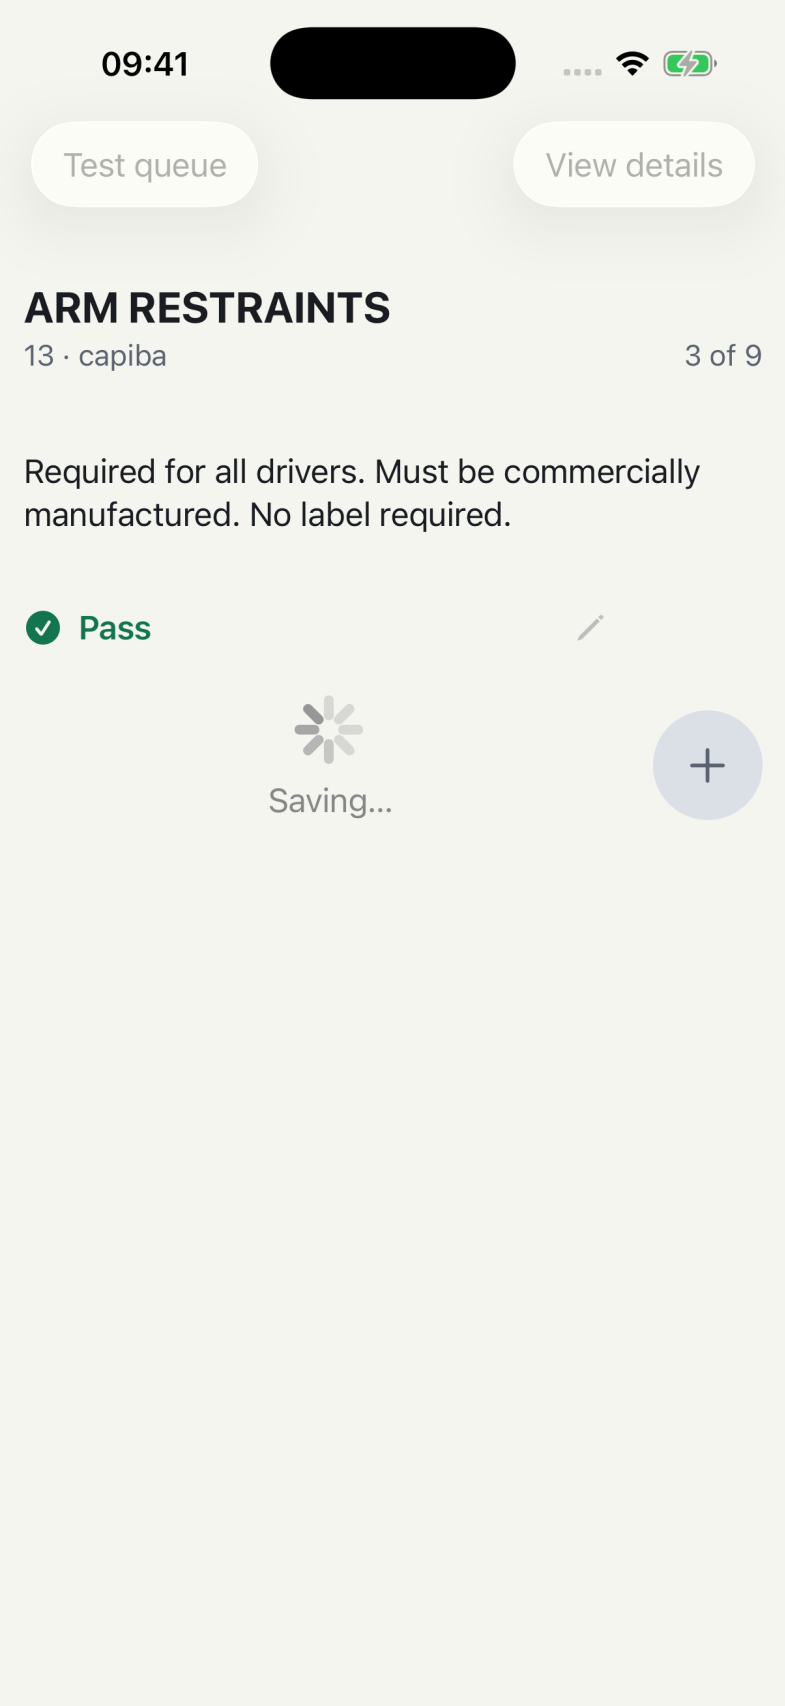

11-save-failure.png | d0ad464

Failed write retains Pass and exposes retry without advancing.

Saving

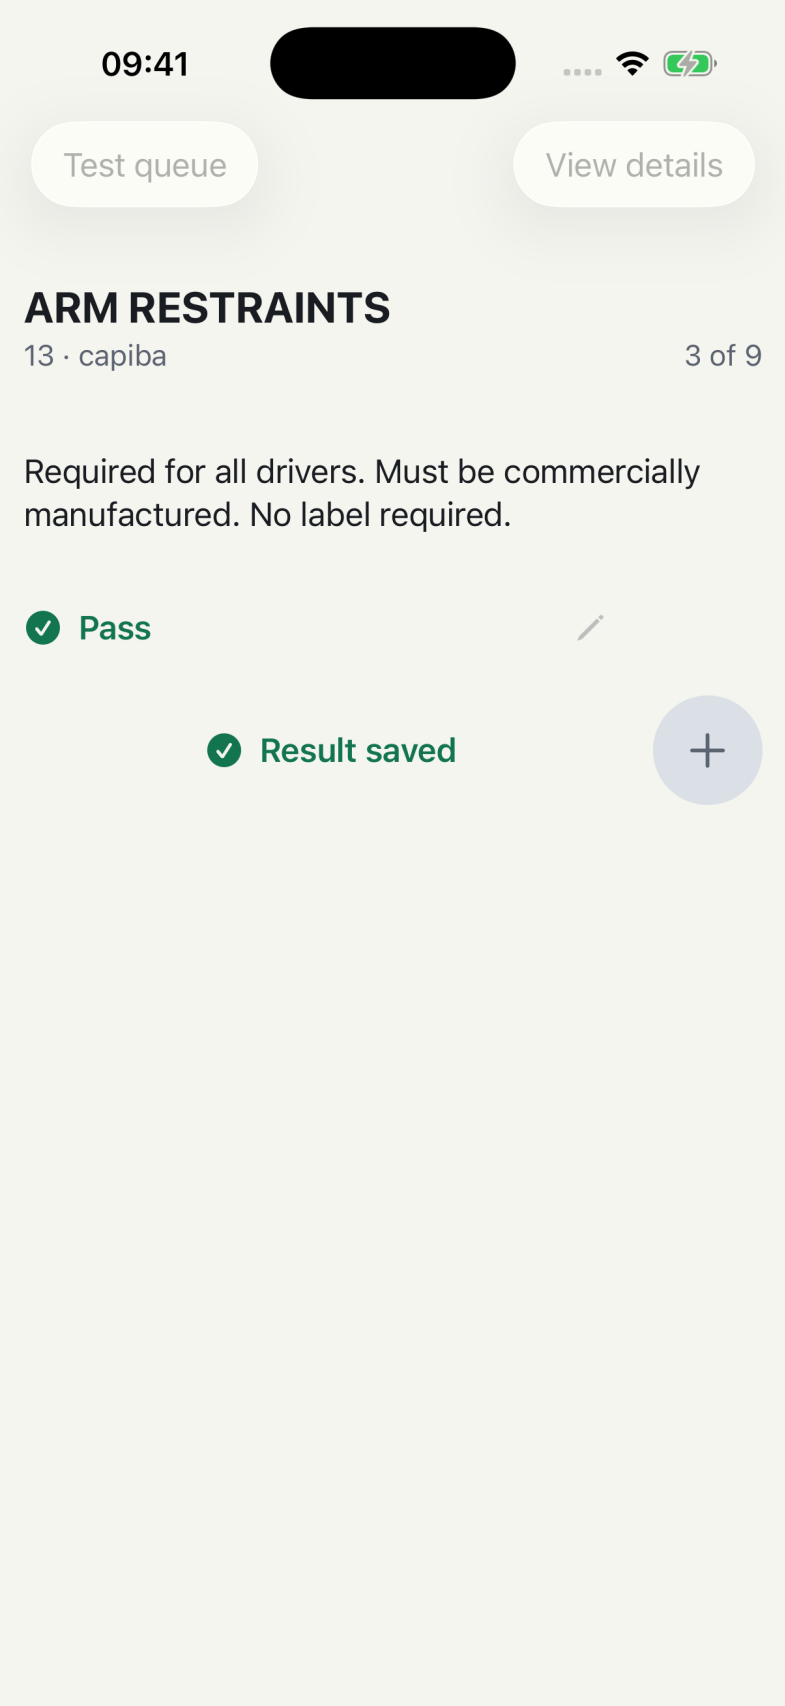

12-saving.png | d0ad464

Saving replaces the primary action and disables navigation.

Confirmed

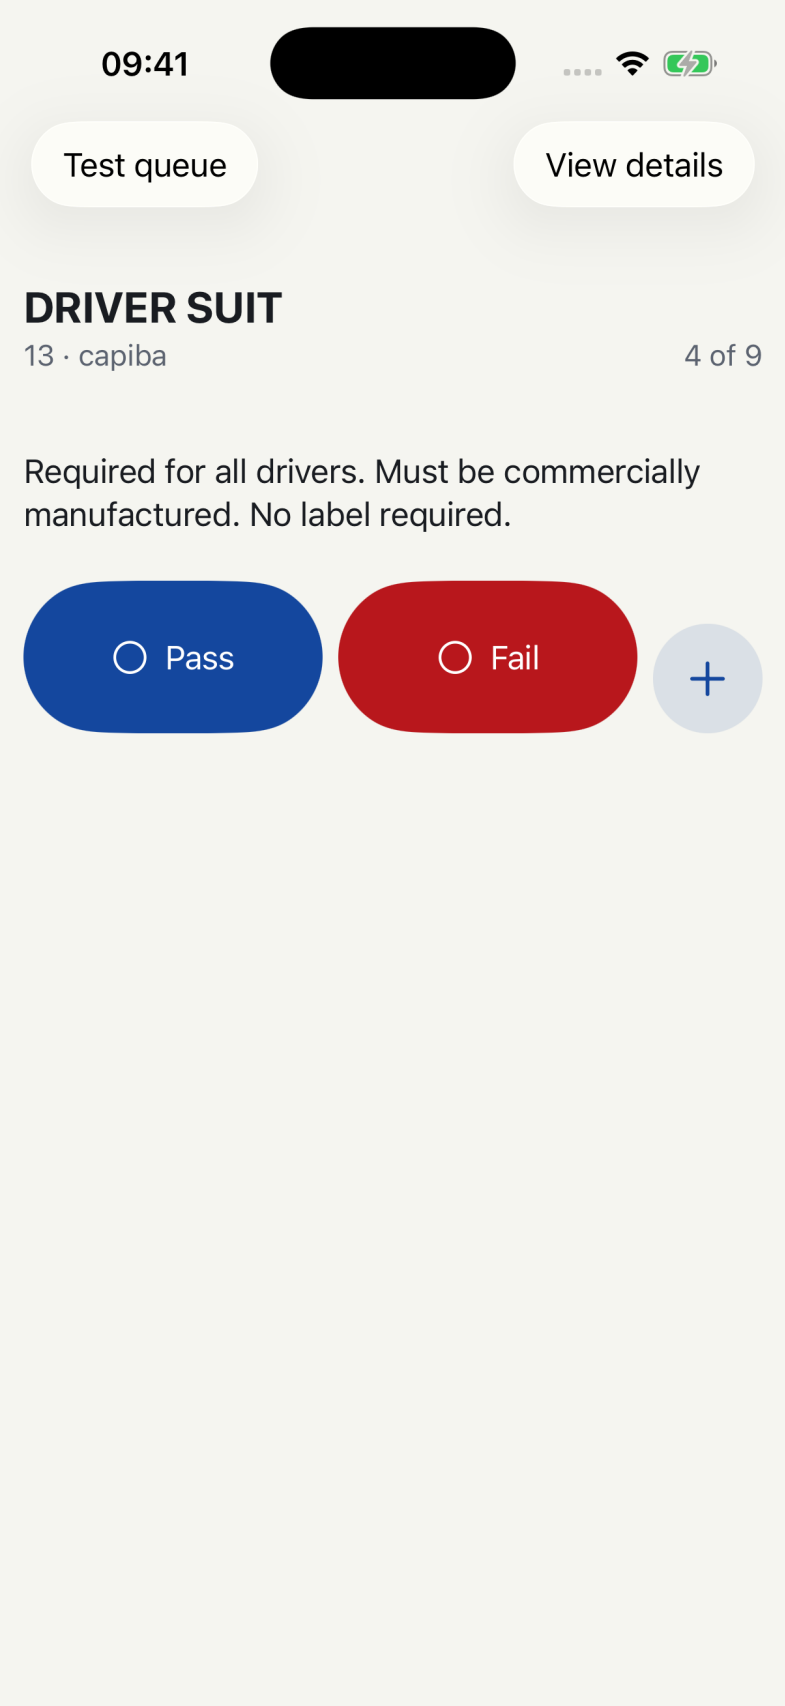

13-confirmed.png | d0ad464

Brief success confirmation; this DEBUG fixture holds the transient state.

Next test

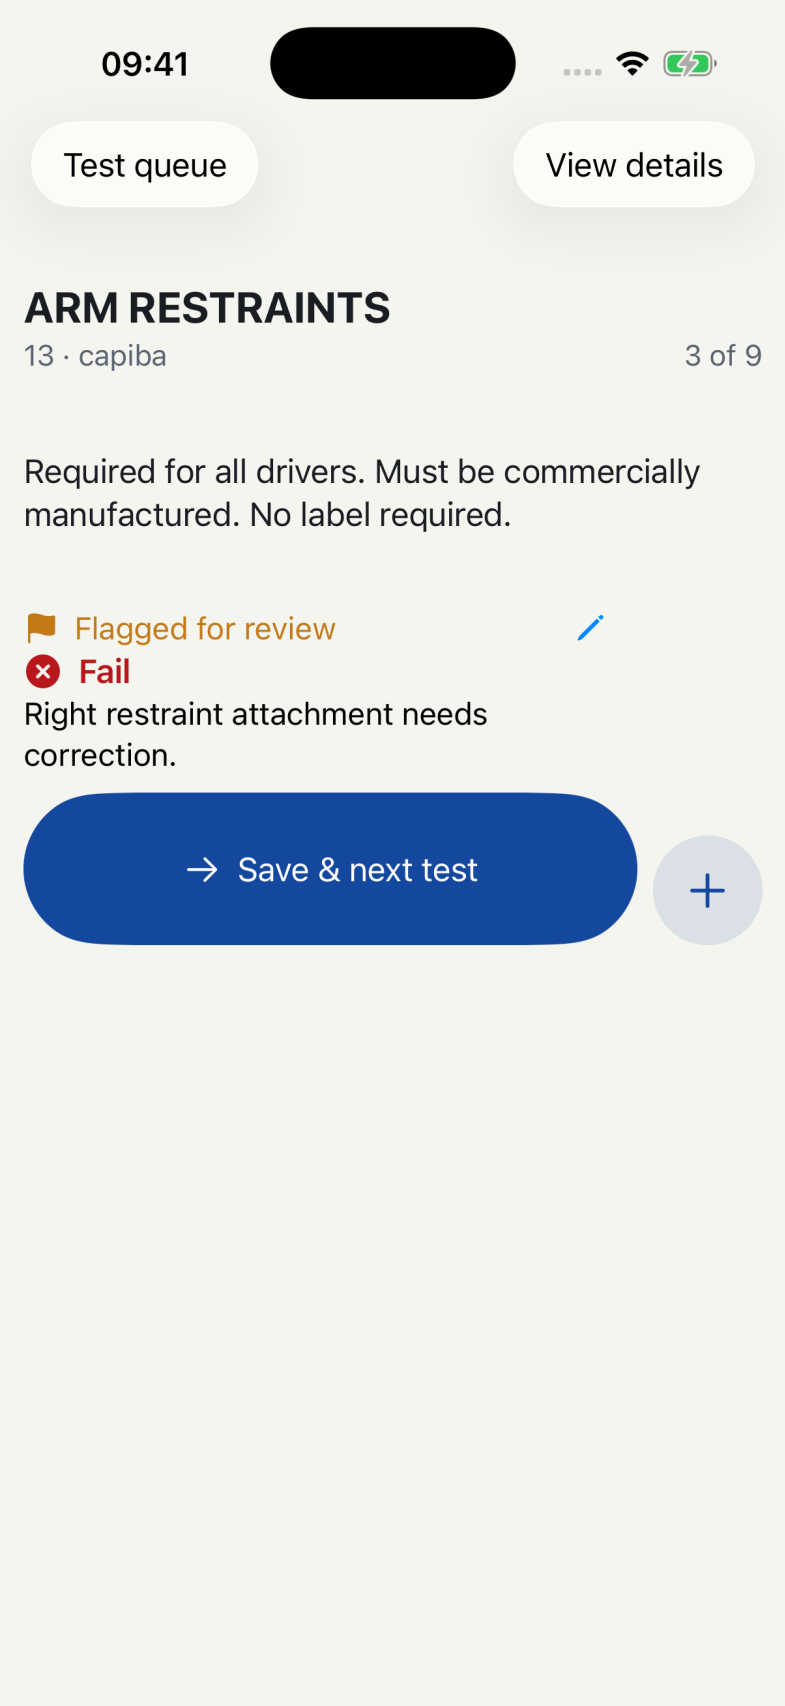

14-next-test.png | d0ad464

Actual confirmation callback opens DRIVER SUIT, 4 of 9.

Flagged result

15-flagged-result.png | d0ad464

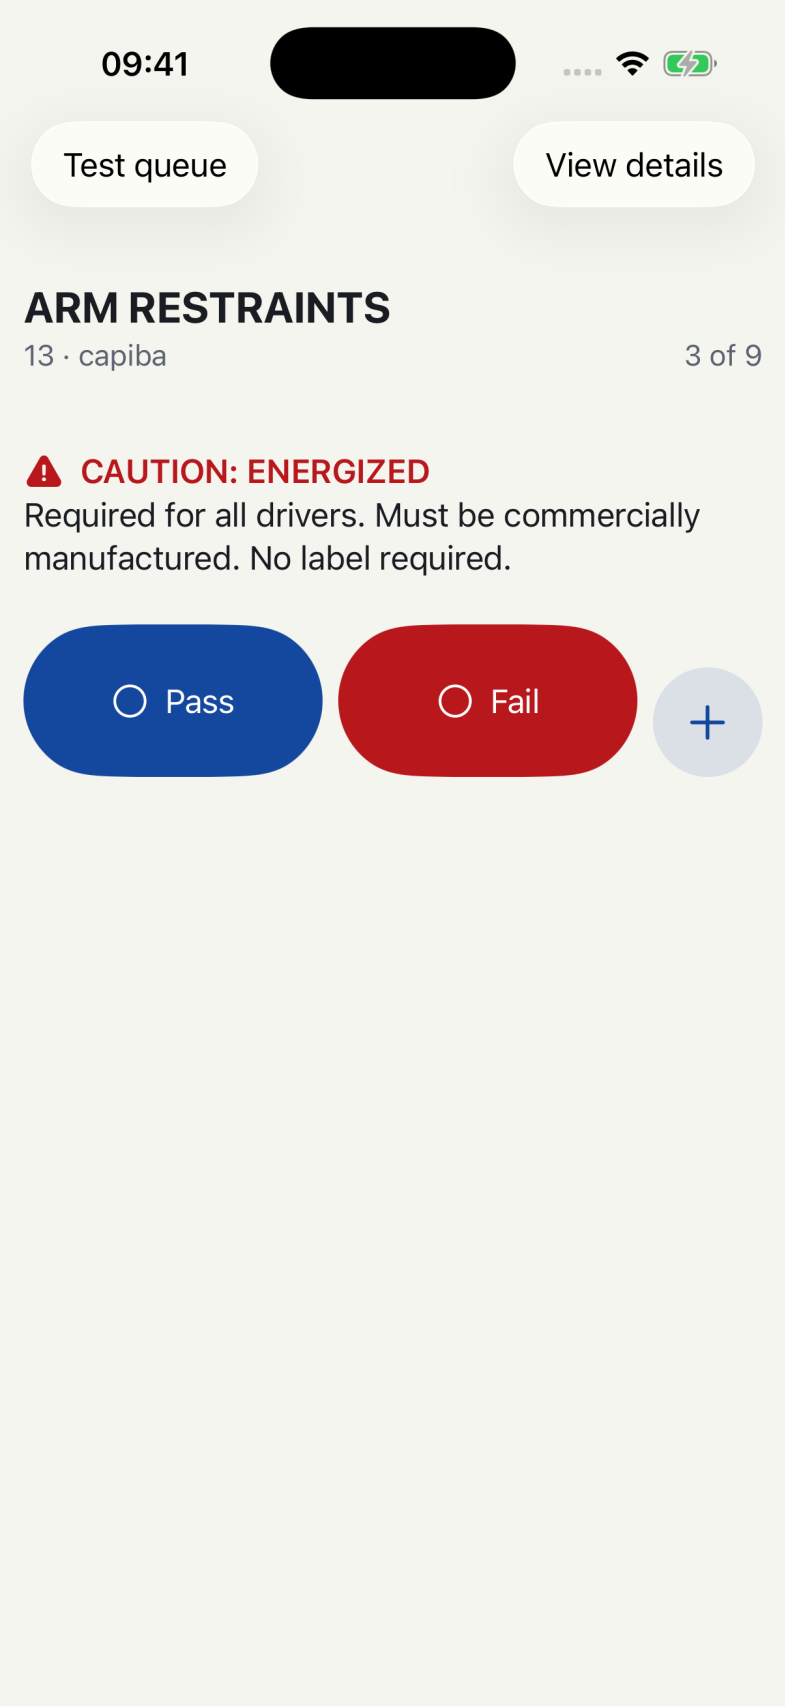

Outcome and unresolved review flag remain separate.

Original: result input and additions

Safety warning

16-safety-warning.png | d0ad464

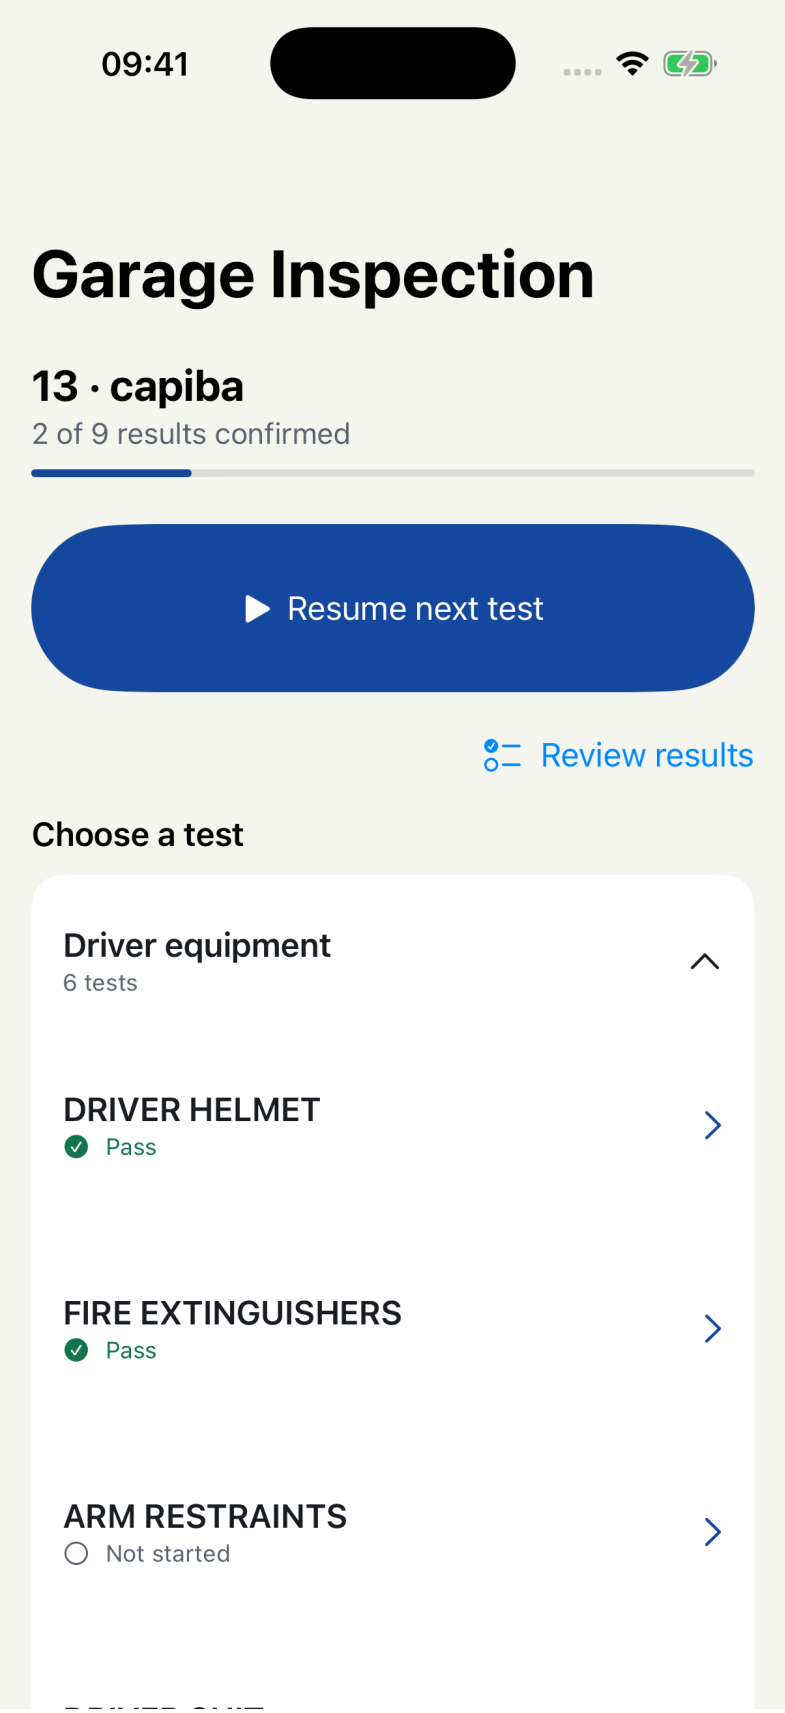

Applicable safety warning stays visible in normal execution.

Original: queue navigation

Pre run queue

01-pre-run-queue.png | c5bb76b

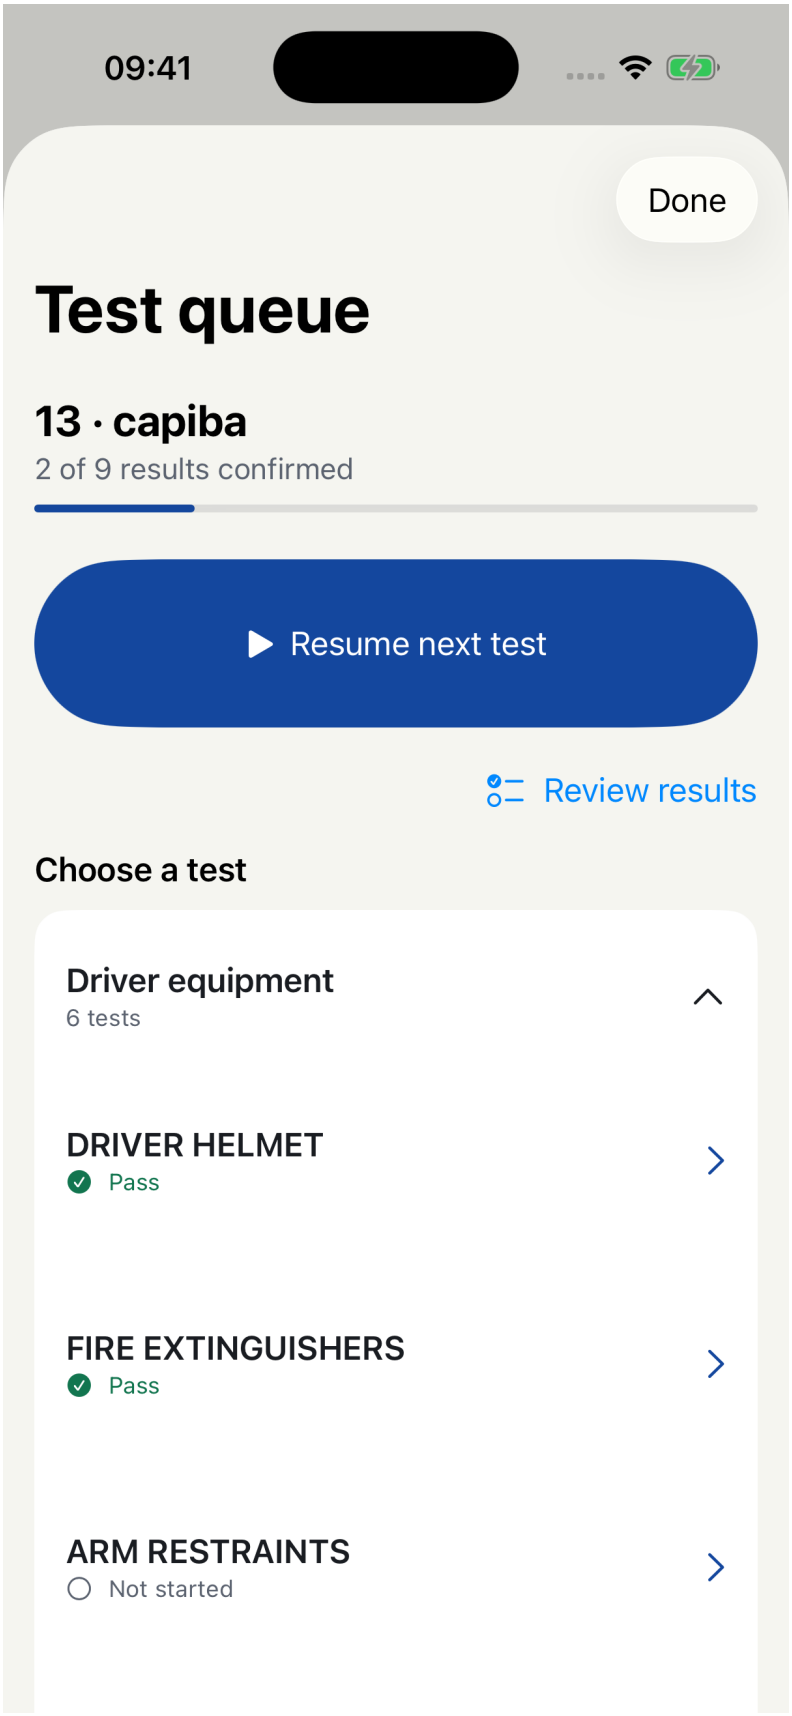

vehicle, confirmed progress, resume next test, and ordered navigation rows.

Original: queue navigation

Queue drawer

02-queue-drawer.png | c5bb76b

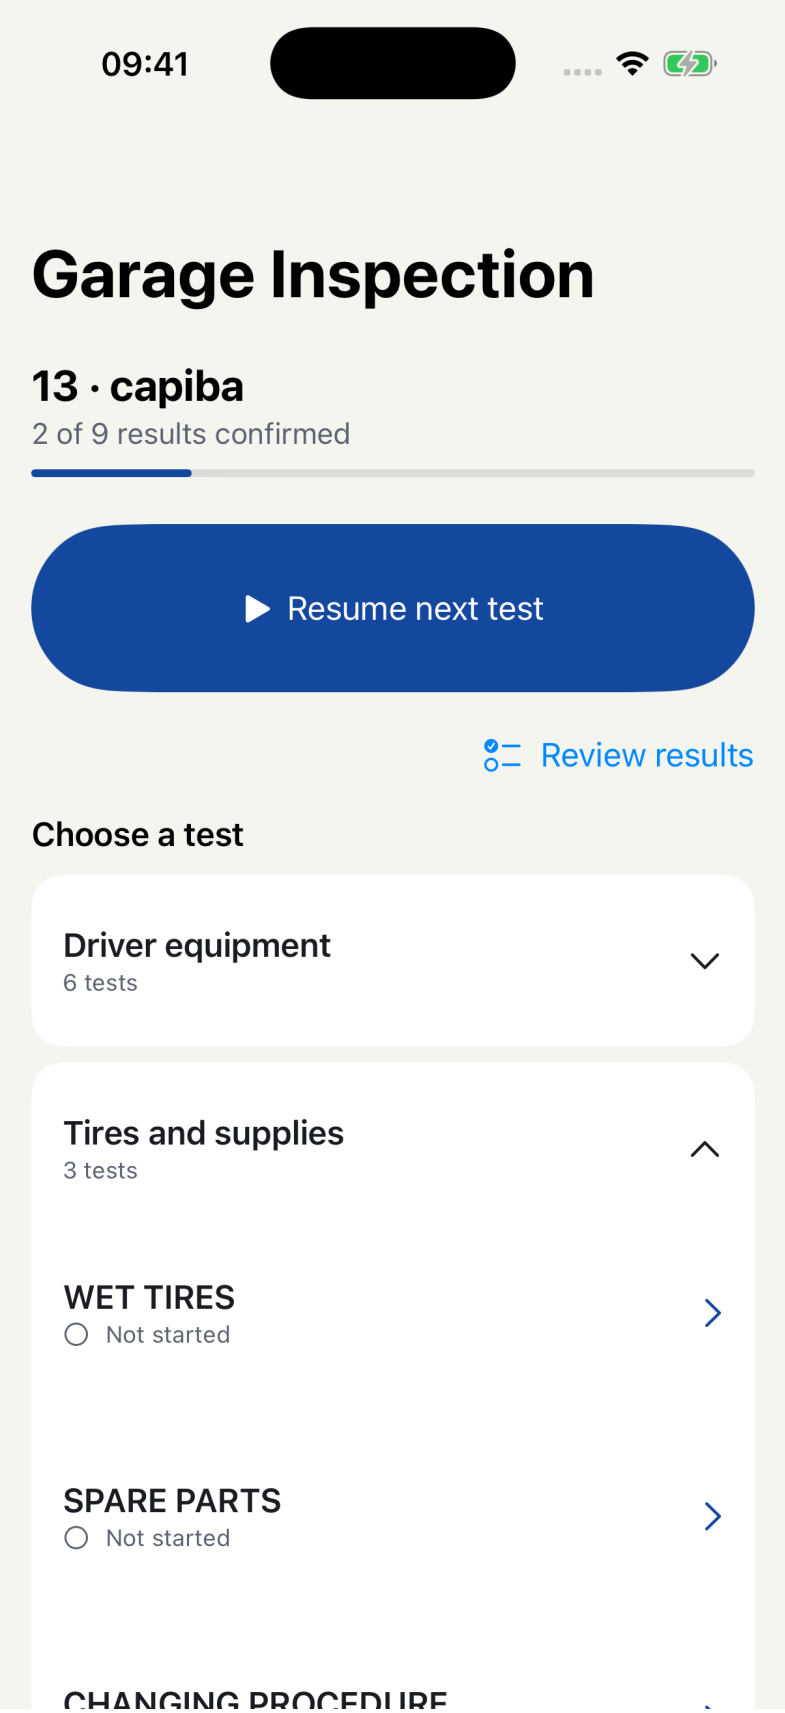

prominent Test queue opens a drawer with an explicit Done return.

Original: queue navigation

Section navigation

03-section-navigation.png | c5bb76b

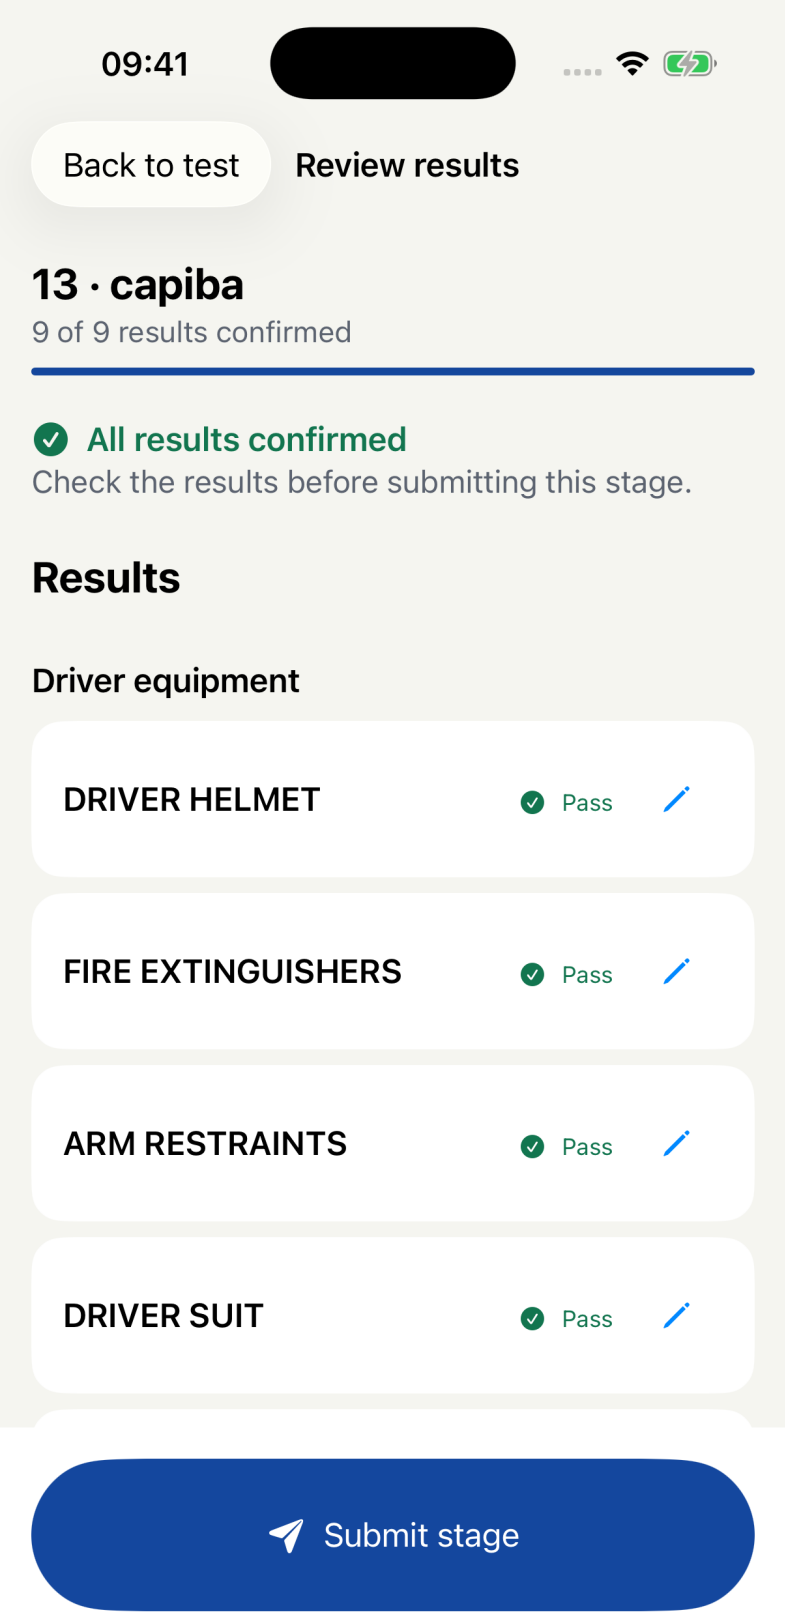

Driver equipment collapsed and Tires and supplies expanded.

Original: review and correction

Completed review

01-completed-review.png | b002245

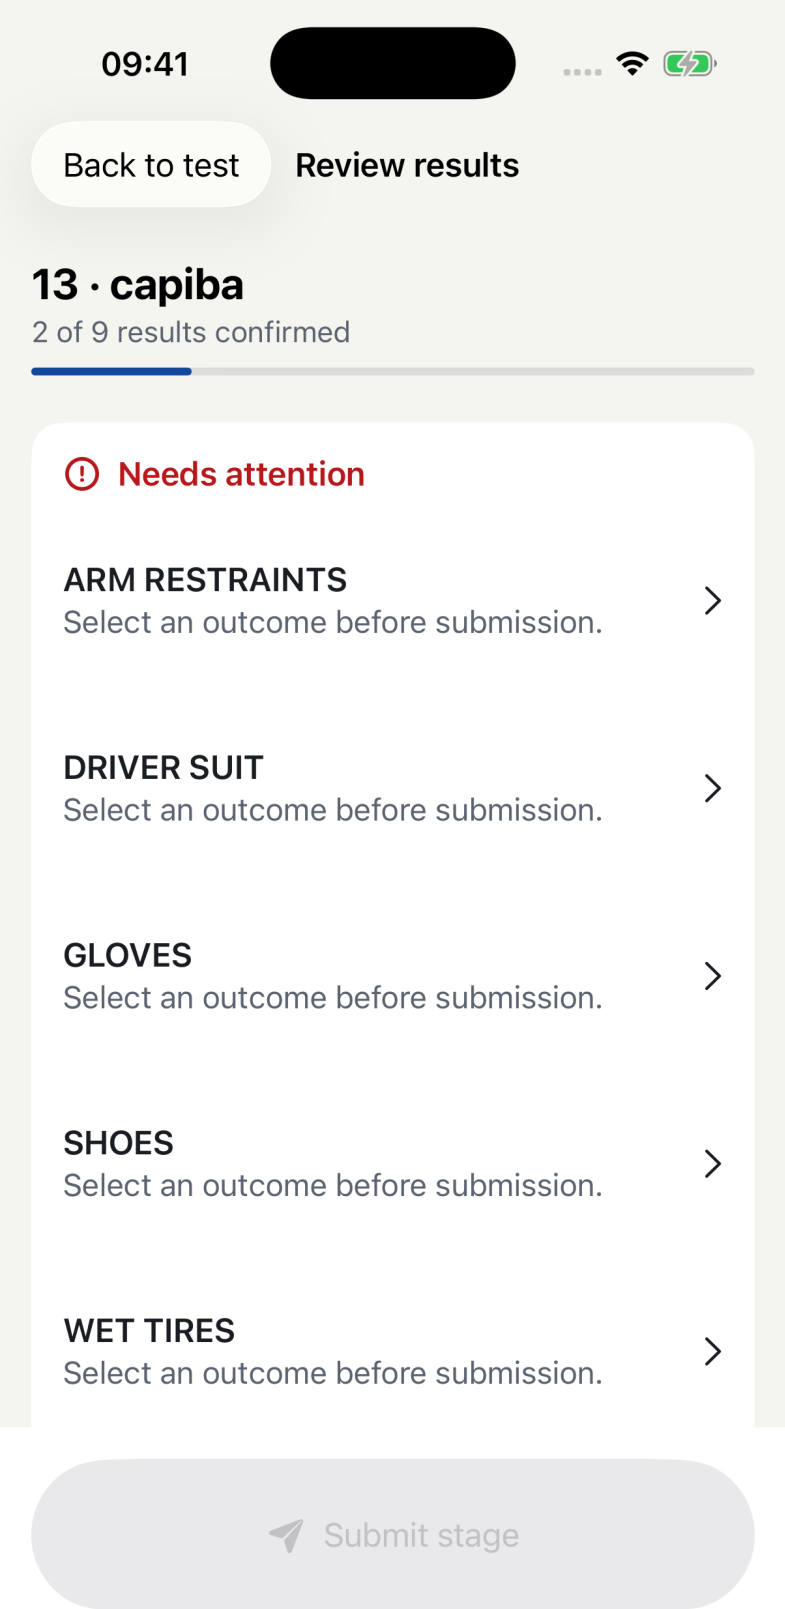

compact confirmed results, explicit Back to test, and final submission action.

Original: review and correction

Incomplete review

02-incomplete-review.png | b002245

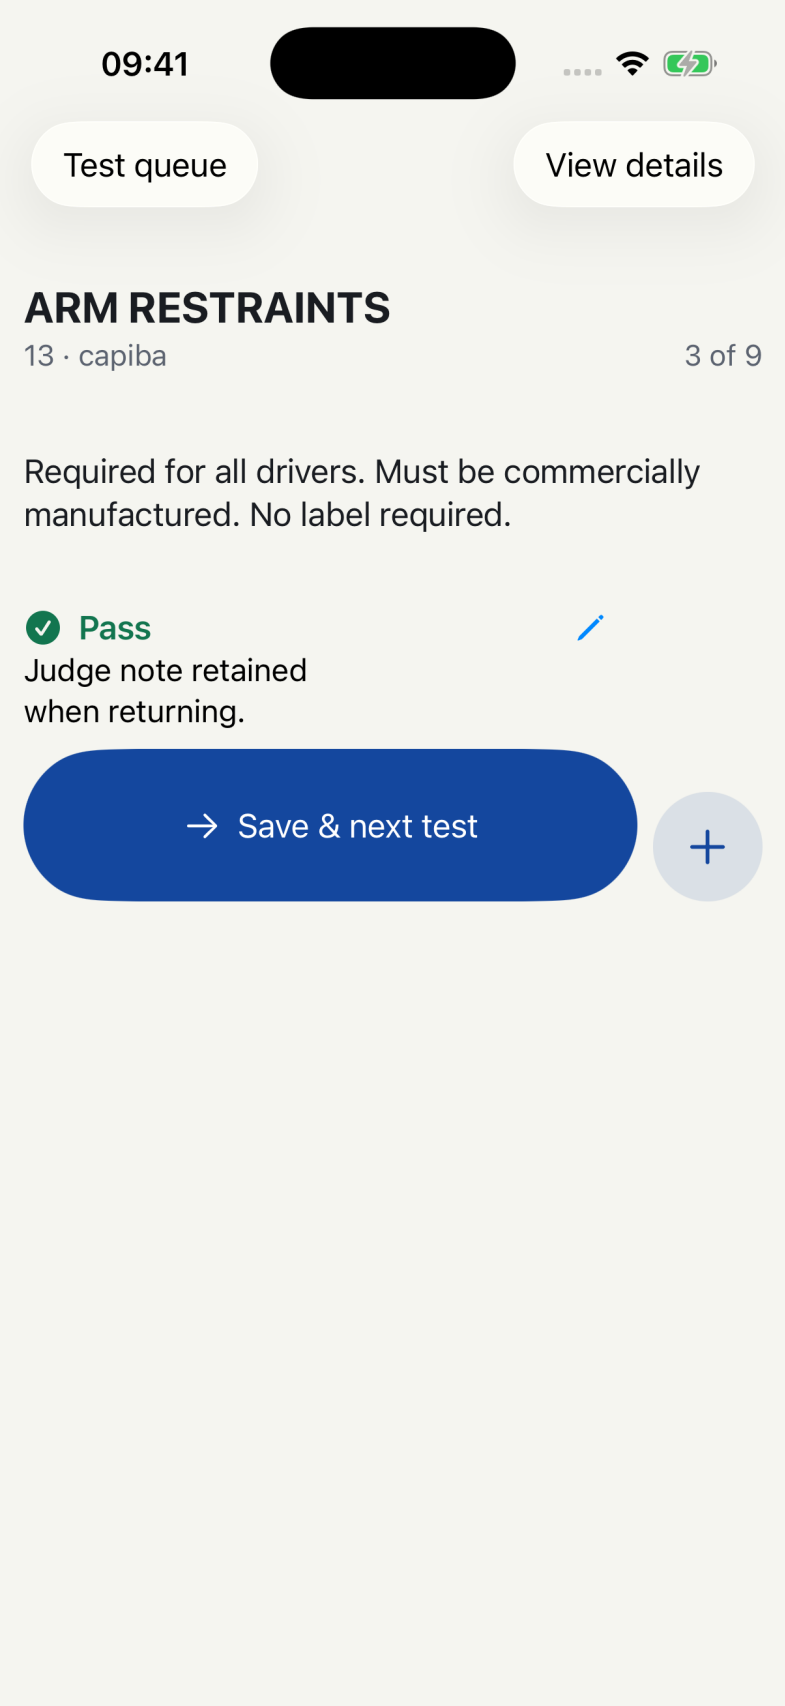

early review with actionable missing input and disabled final submission.

Original: review and correction

Return to test

03-return-to-test.png | b002245

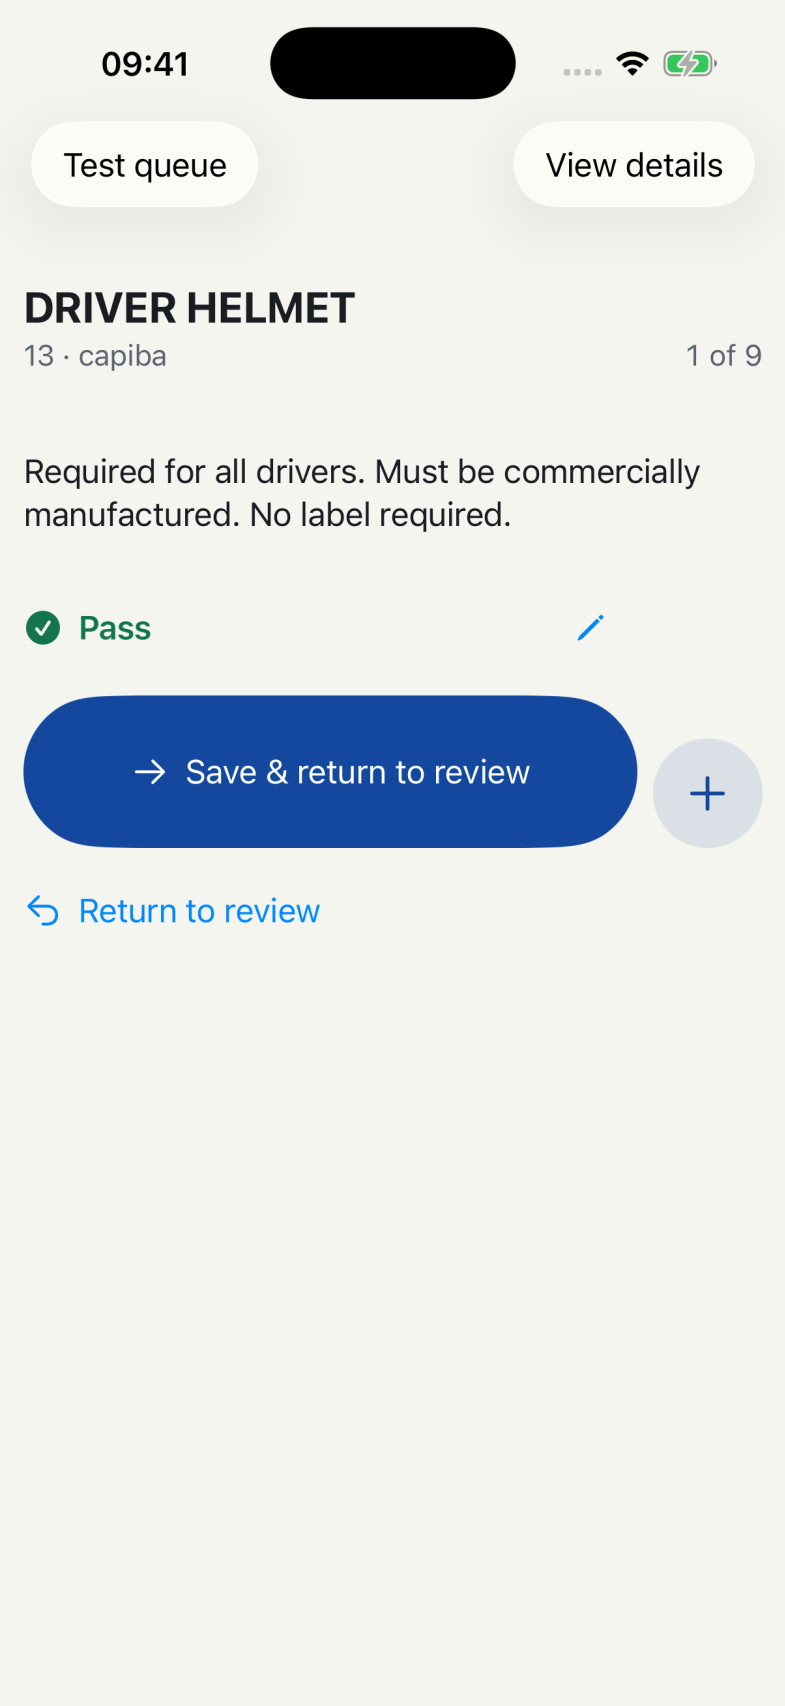

actual coordinator return to test 3, retaining the selected Pass and judge note.

Original: review and correction

Review correction

04-review-correction.png | b002245

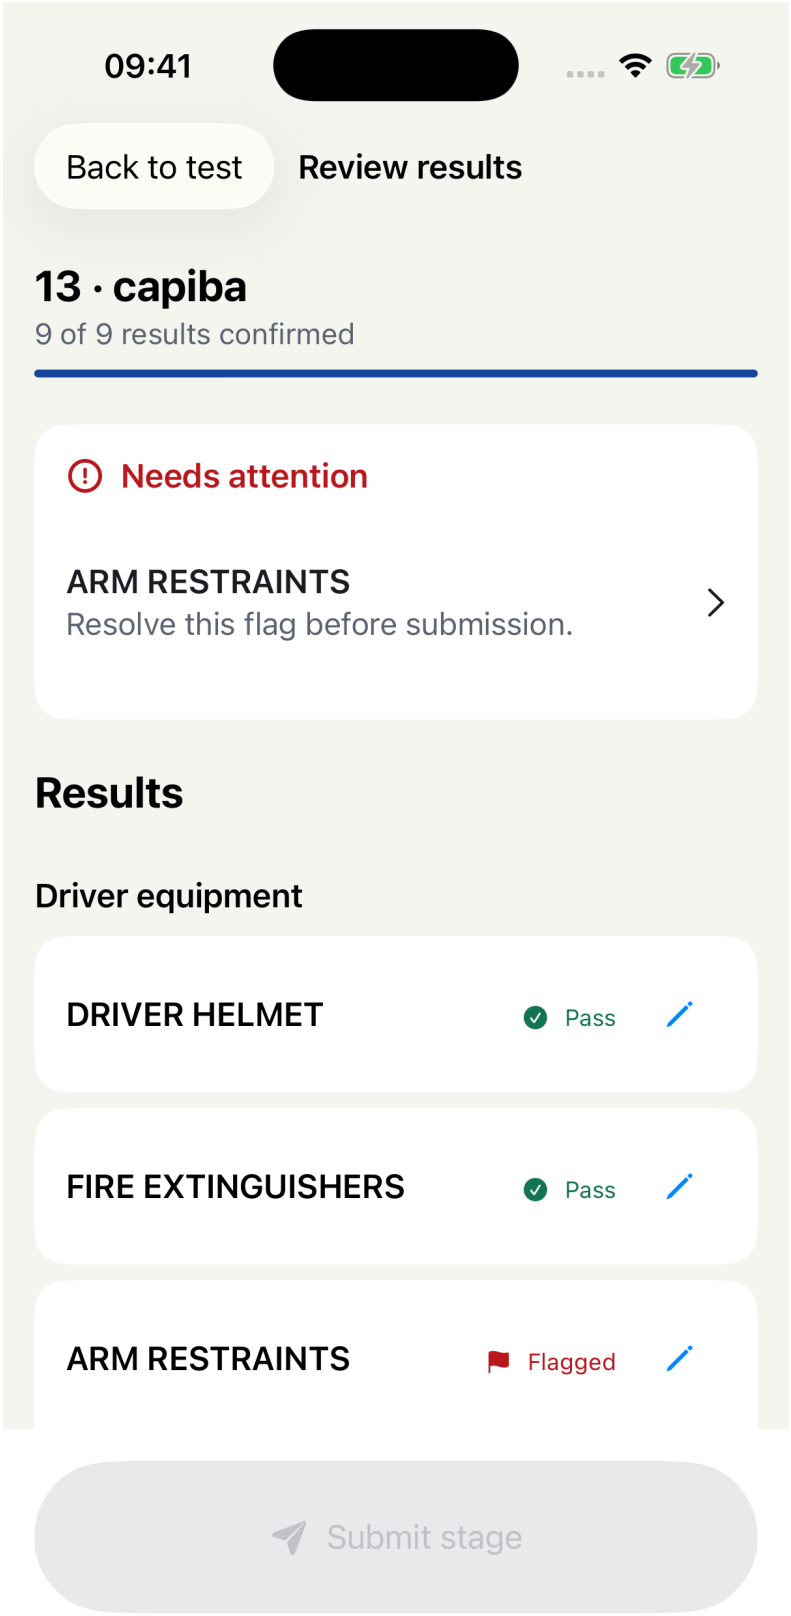

editing test 1 from review shows Save & return to review and a separate return without confirmation.

Original: review and correction

Flagged review

05-flagged-review.png | b002245

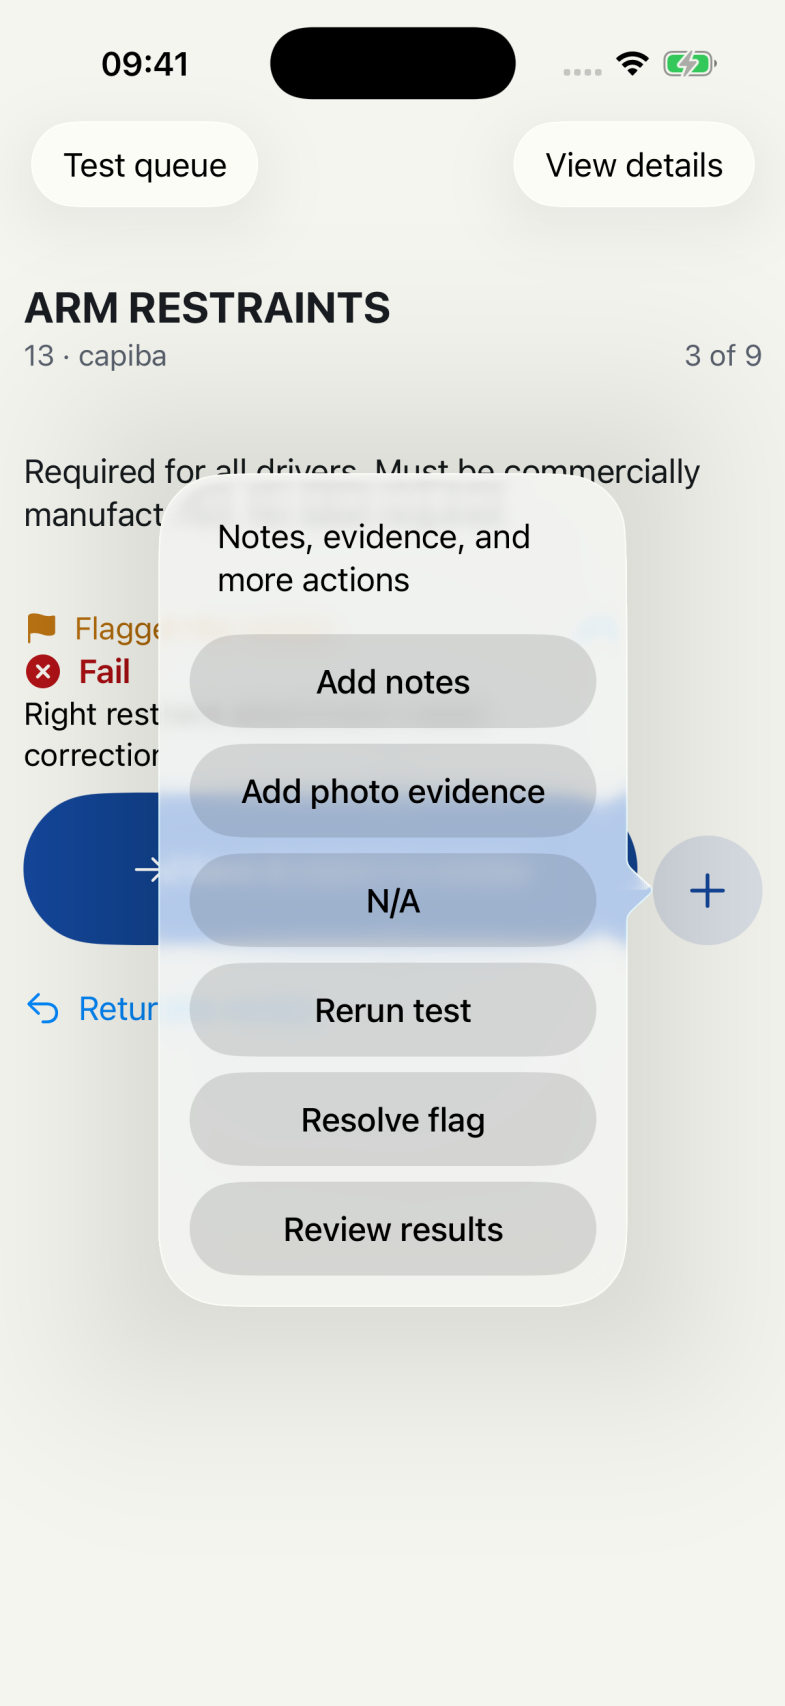

an unresolved flag blocks submission despite all results being confirmed.

Original: review and correction

Resolve flag

06-resolve-flag.png | b002245

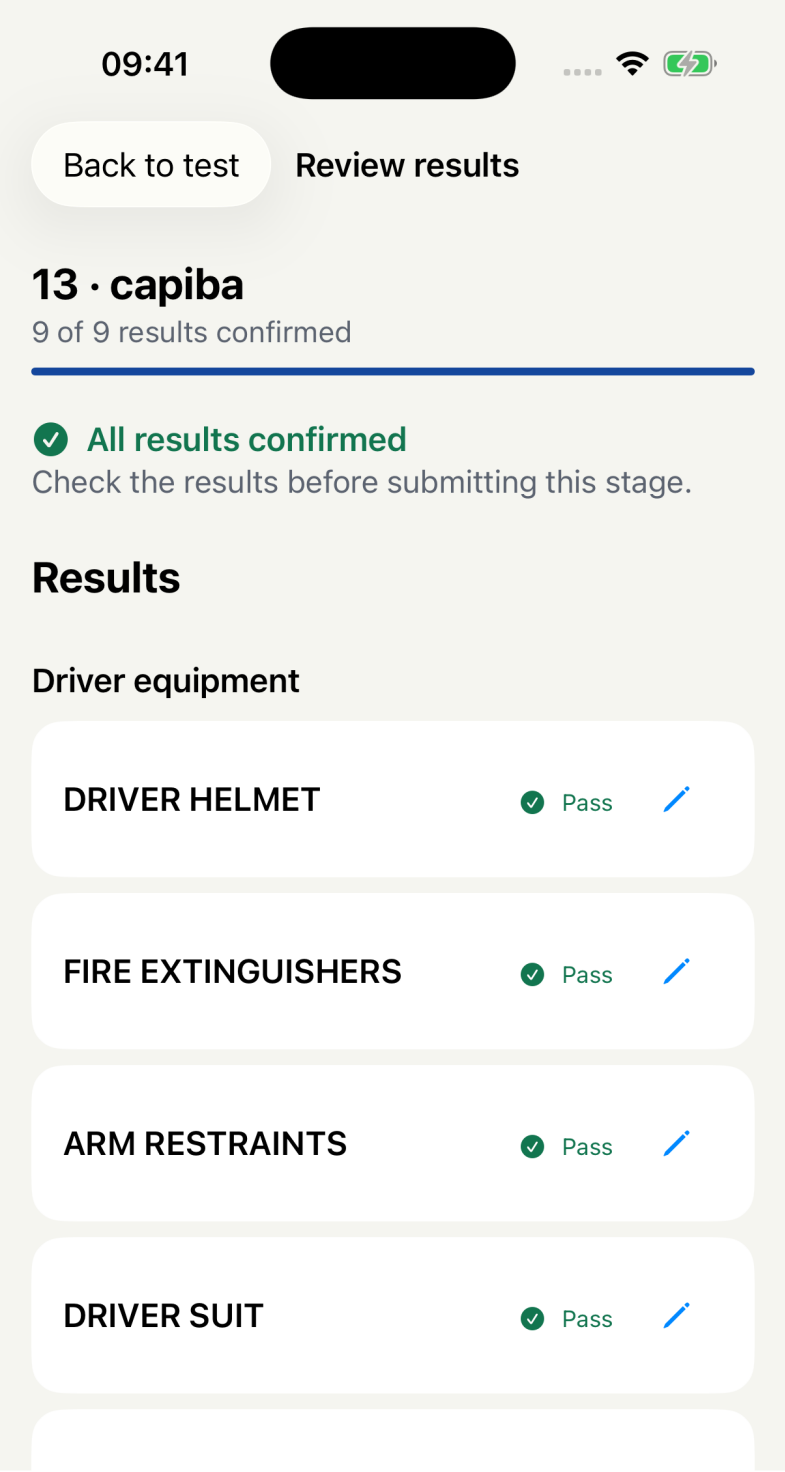

the secondary menu includes Resolve flag; the recorded Fail and notes remain visible.

Original: review and correction

Submitted

07-submitted.png | b002245

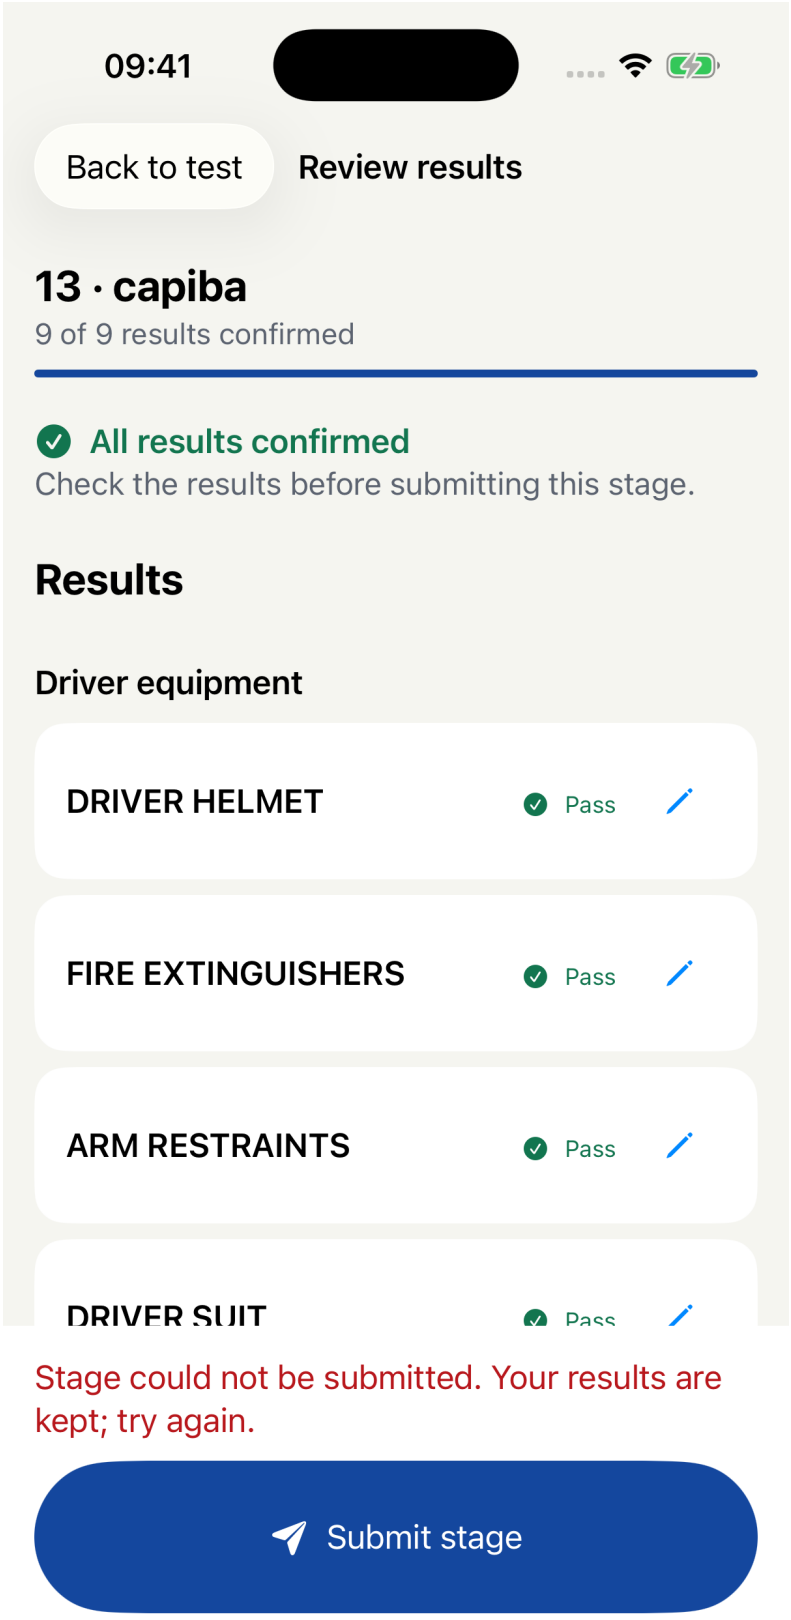

an actual isolated stage snapshot write produces Stage submitted.

Original: review and correction

Submission failure

08-submission-failure.png | b002245

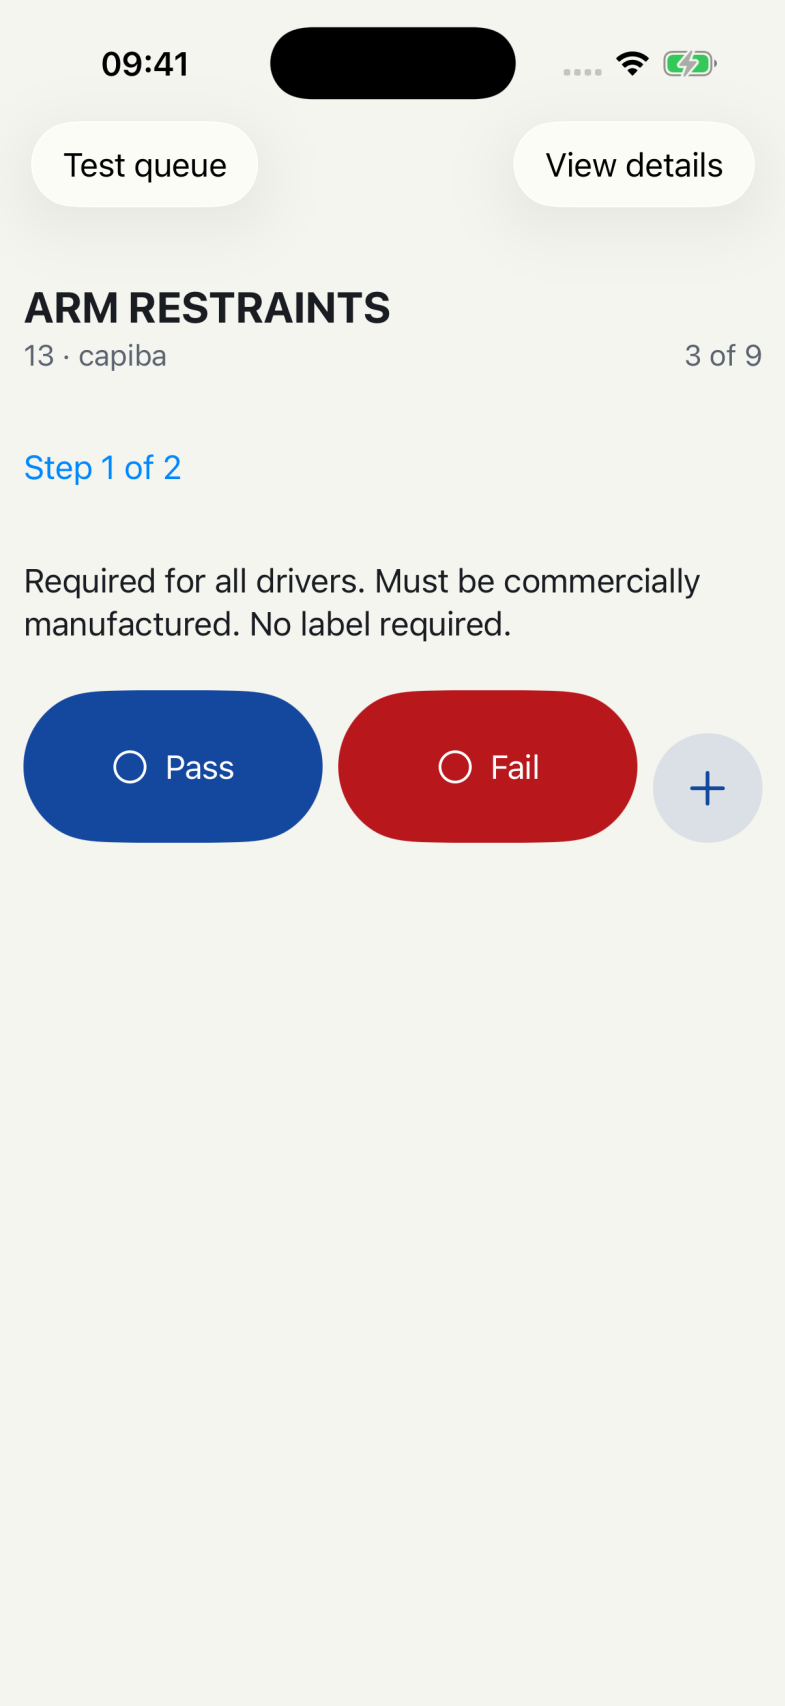

simulated write failure preserves the review and exposes retry.

Original: review and correction

Multiple steps

09-multiple-steps.png | b002245

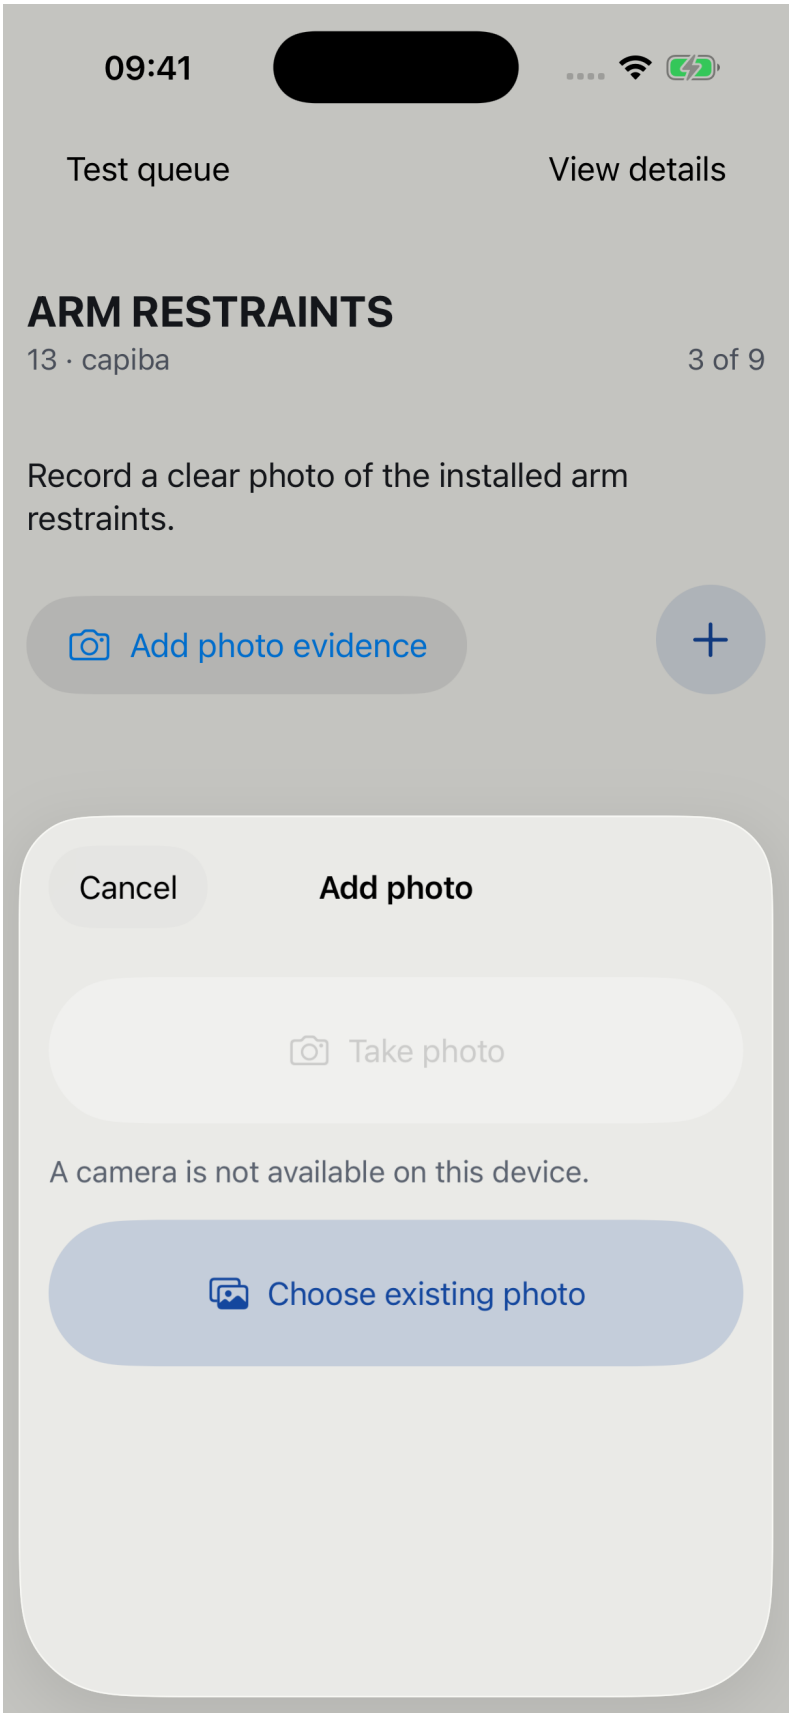

real multi-step navigation remains; single-step progress labels are removed.

Original: photo capture

Photo sources

01-photo-sources.png | dcd9f3b

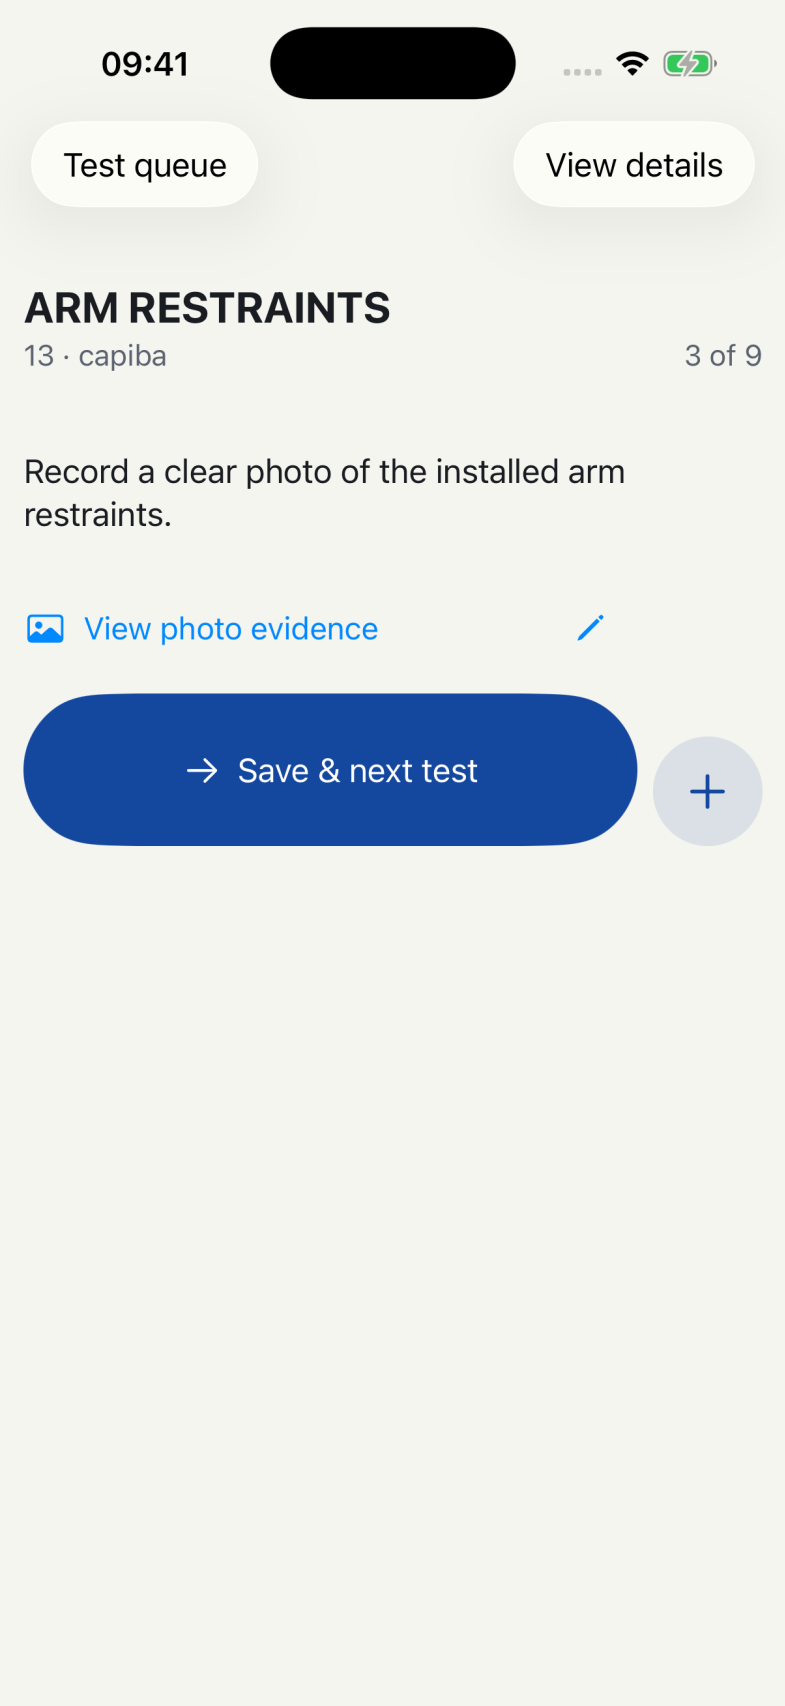

the actual source sheet offers Take photo and Choose existing photo. The simulator has no camera, so capture is disabled with a clear explanation.

Original: photo capture

Persisted photo

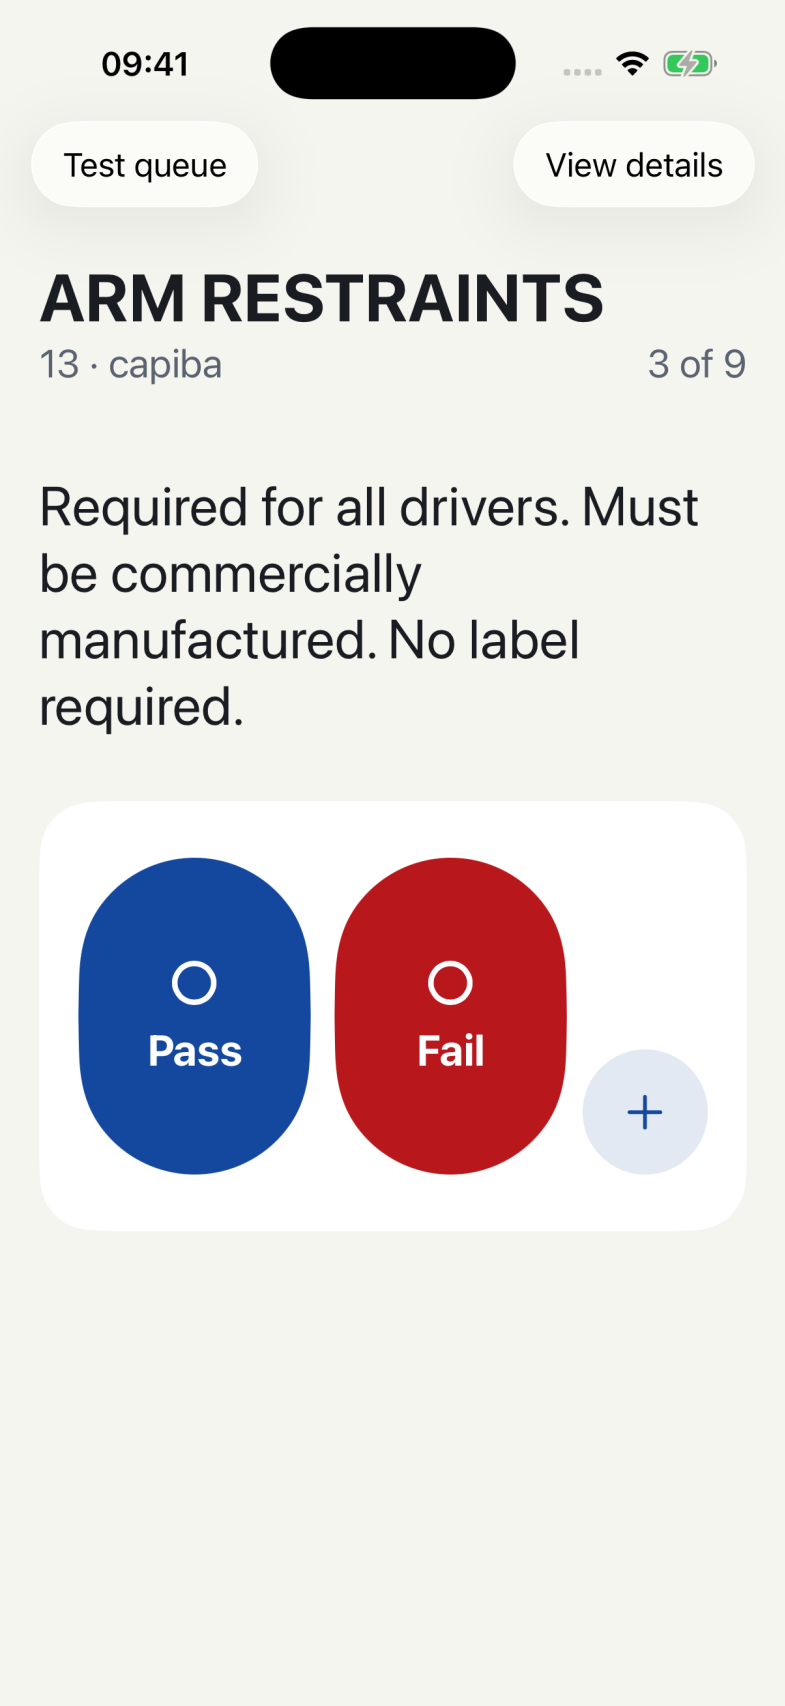

02-persisted-photo.png | dcd9f3b

a real stored image file satisfies the required-photo field and exposes preview and Save & next test. This isolated image is fixture evidence, not a physical camera capture.

Large input

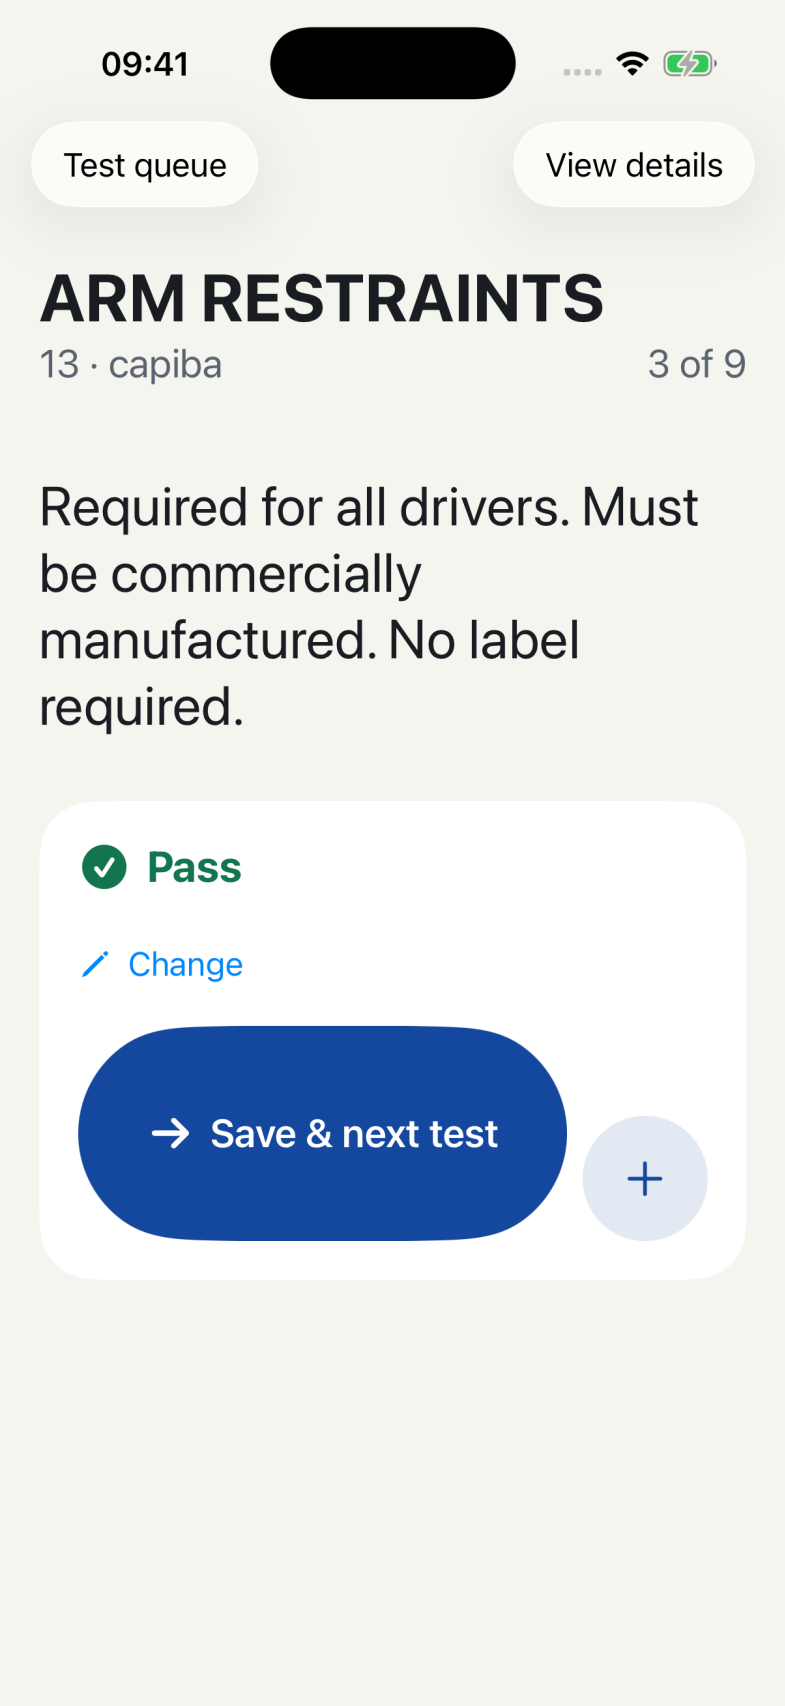

01-large-input.png | 2e86799

Larger task text and rounded Pass/Fail controls (`focus`).

Ready

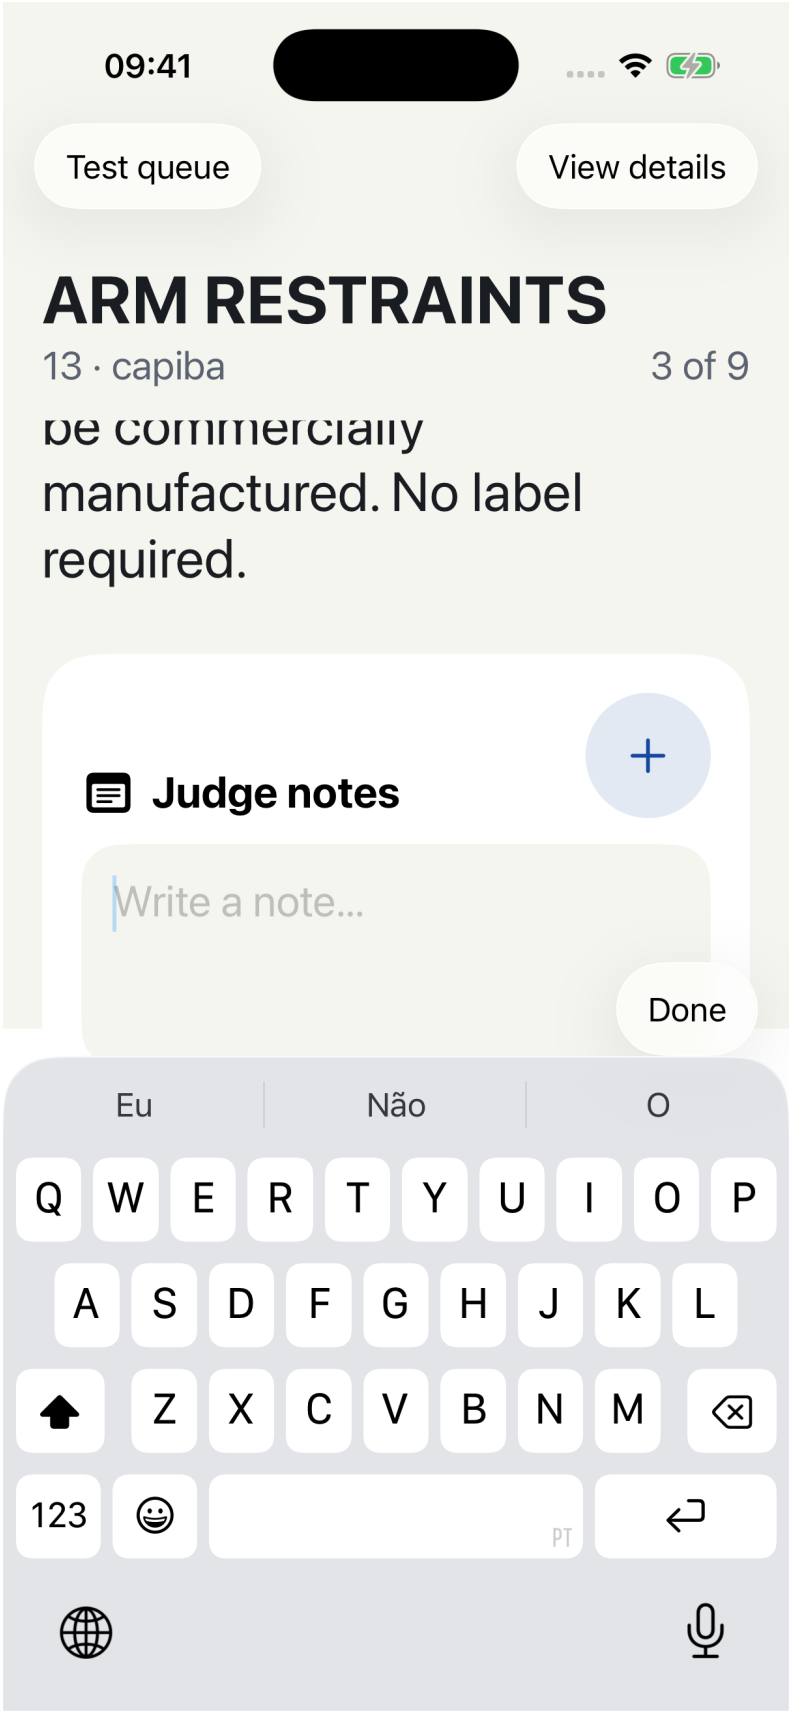

02-ready.png | 2e86799

Editable selected result and large Save & next action (`ready`).

Notes editor

03-notes-editor.png | 2e86799

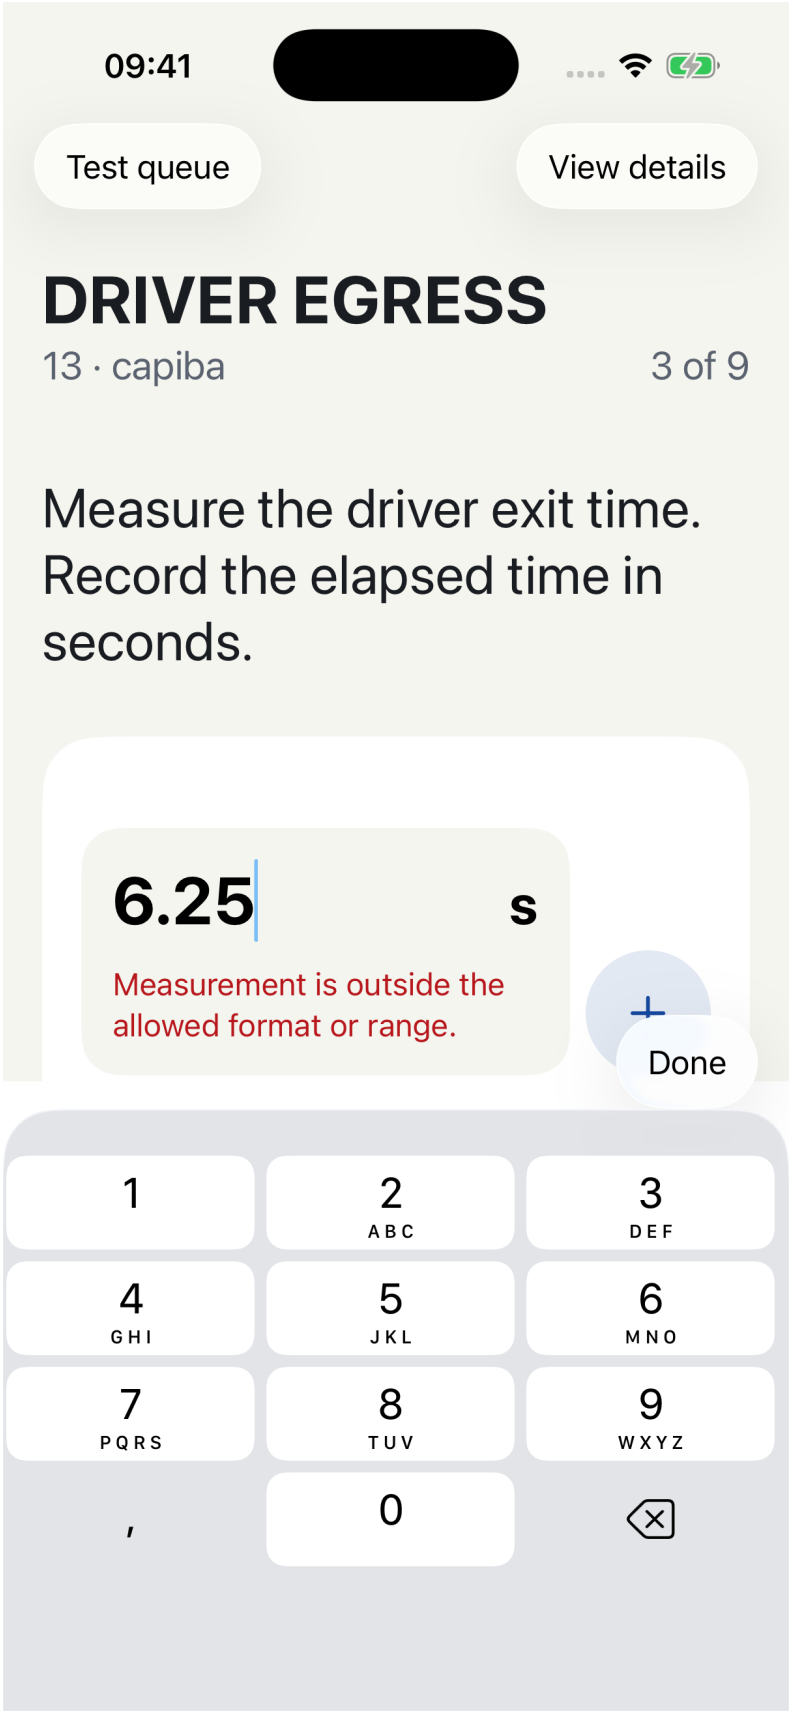

Optional note action expands into an editor with one keyboard Done action (`optional-notes`).

PR #87: larger adaptive inputs

Measurement range

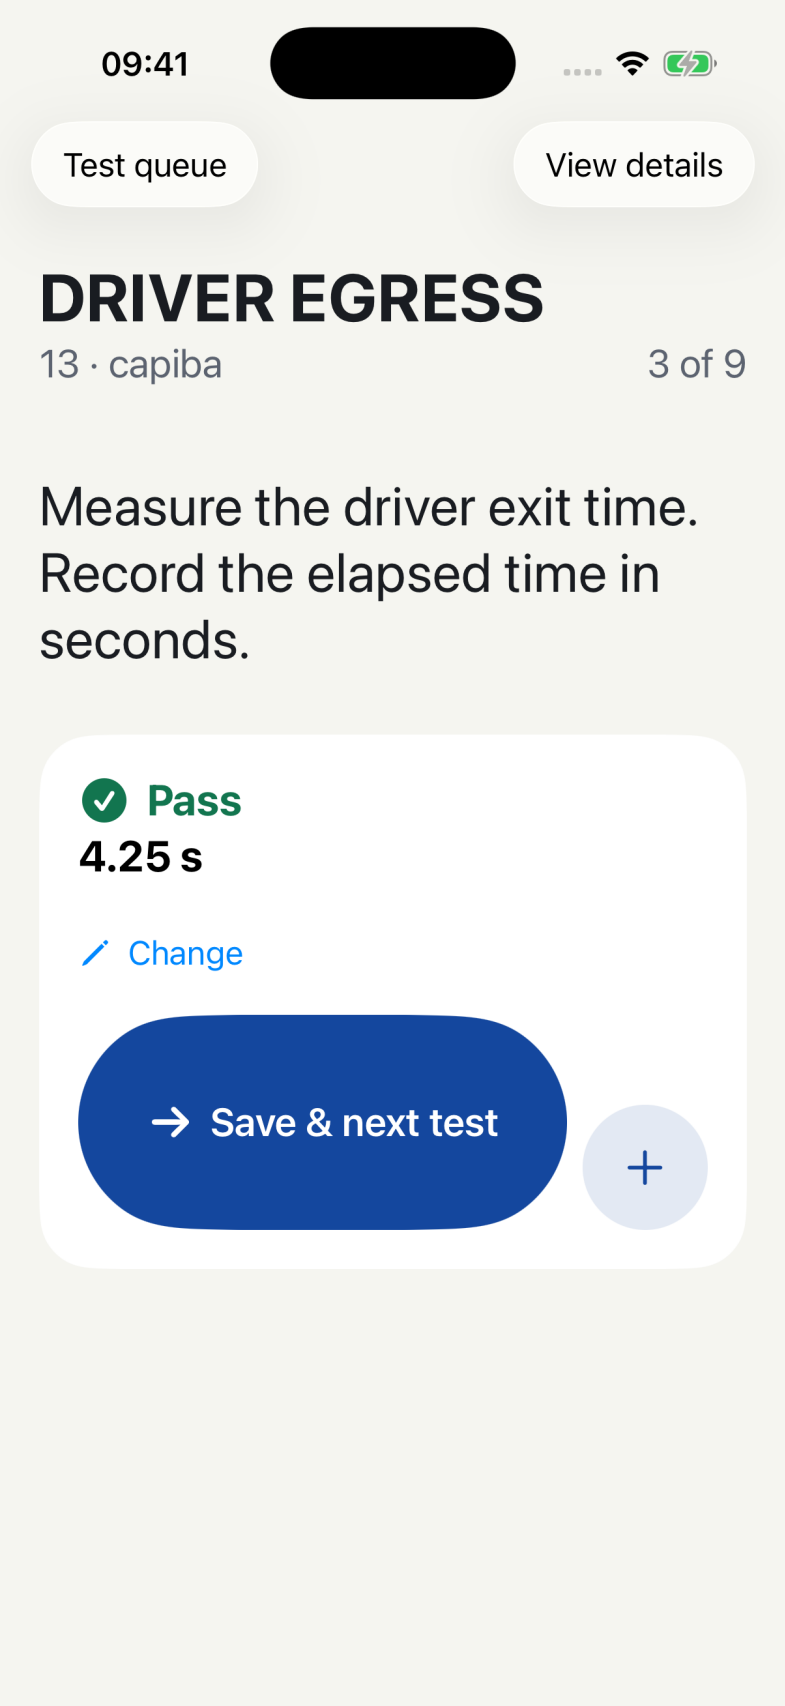

04-measurement-range.png | 2e86799

Large numeric entry and immediate out-of-range feedback (`measurement -inspection-invalid-measurement`).

Measurement ready

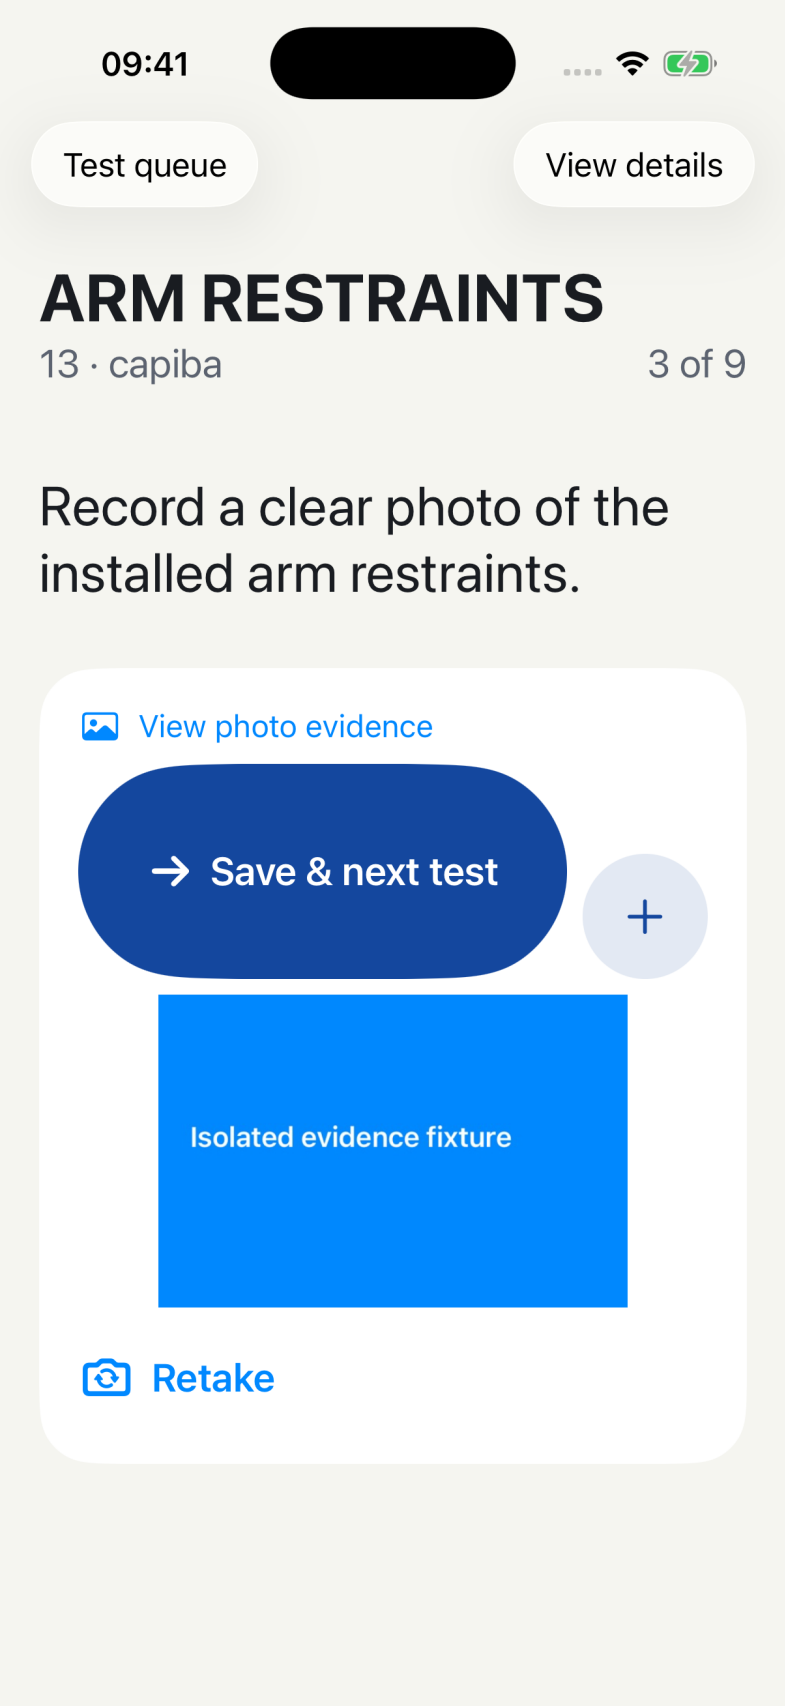

05-measurement-ready.png | 2e86799

Valid 4.25 s result remains explicit and editable (`measurement-ready`).

Photo preview

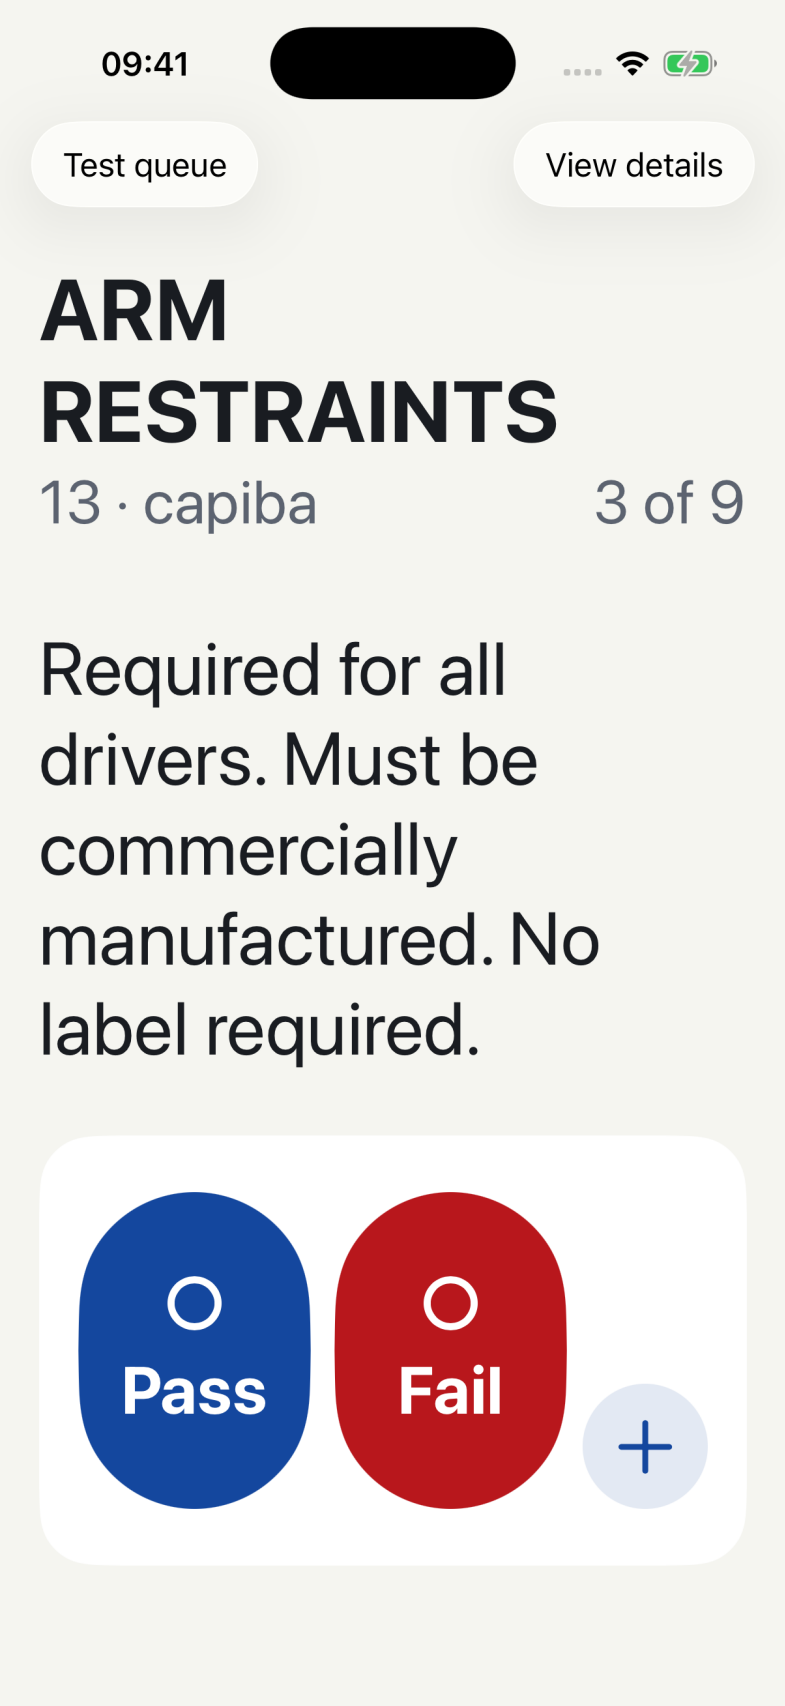

06-photo-preview.png | 2e86799

Actual stored photo thumbnail with View/Retake (`evidence-ready`).

Larger text

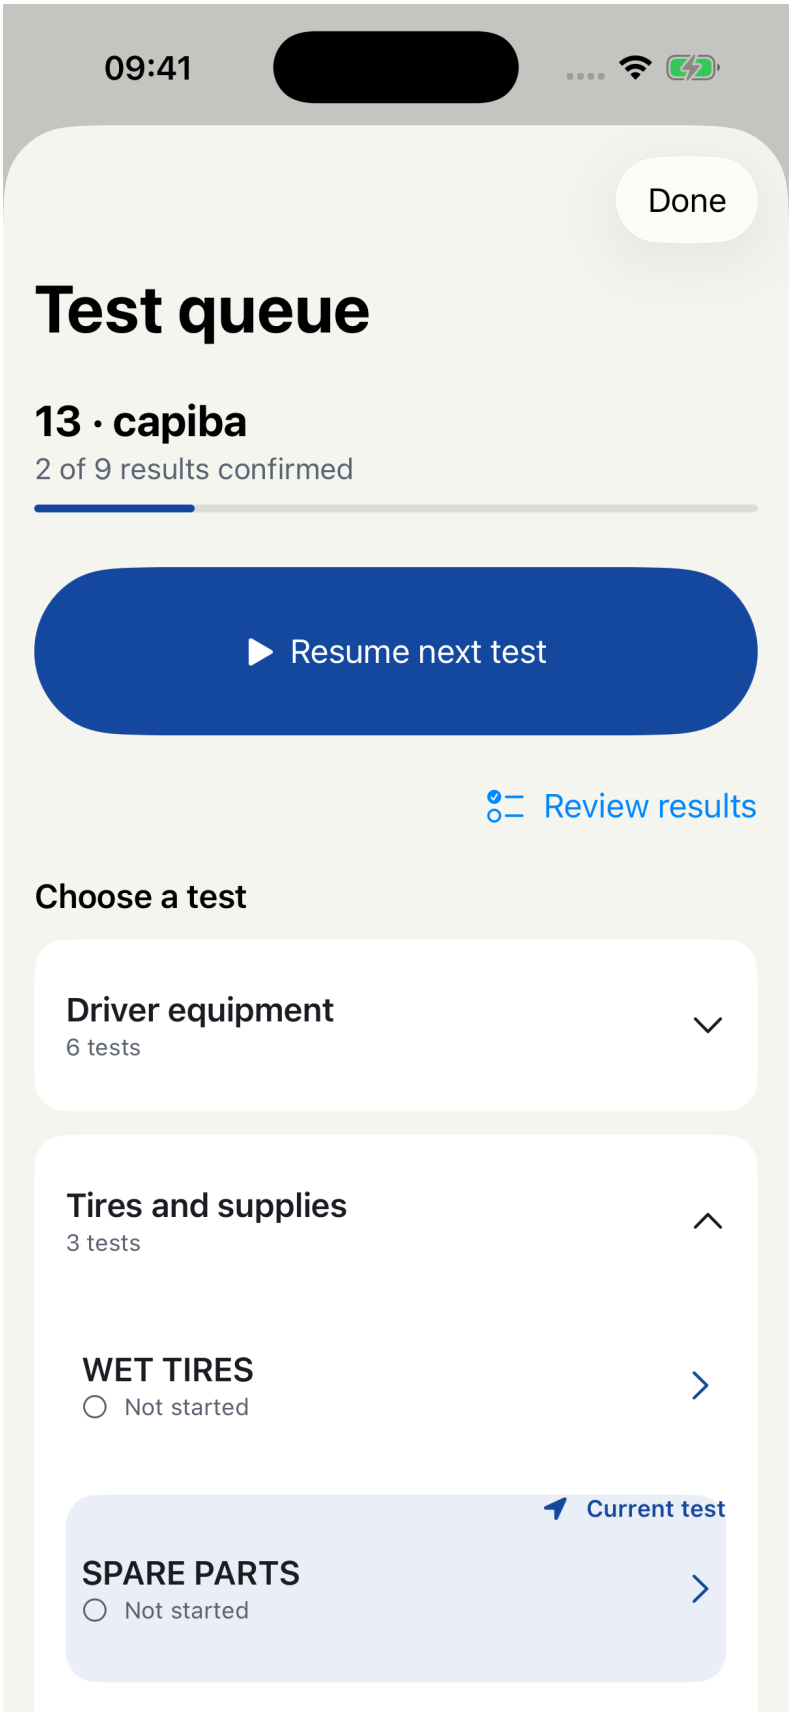

07-larger-text.png | 2e86799

Accessibility-size text wraps and scrolls (`focus -inspection-large-text`).

Current test queue

01-current-test-queue.png | 4d3a014 (outcome follow-up: 9101e7e)

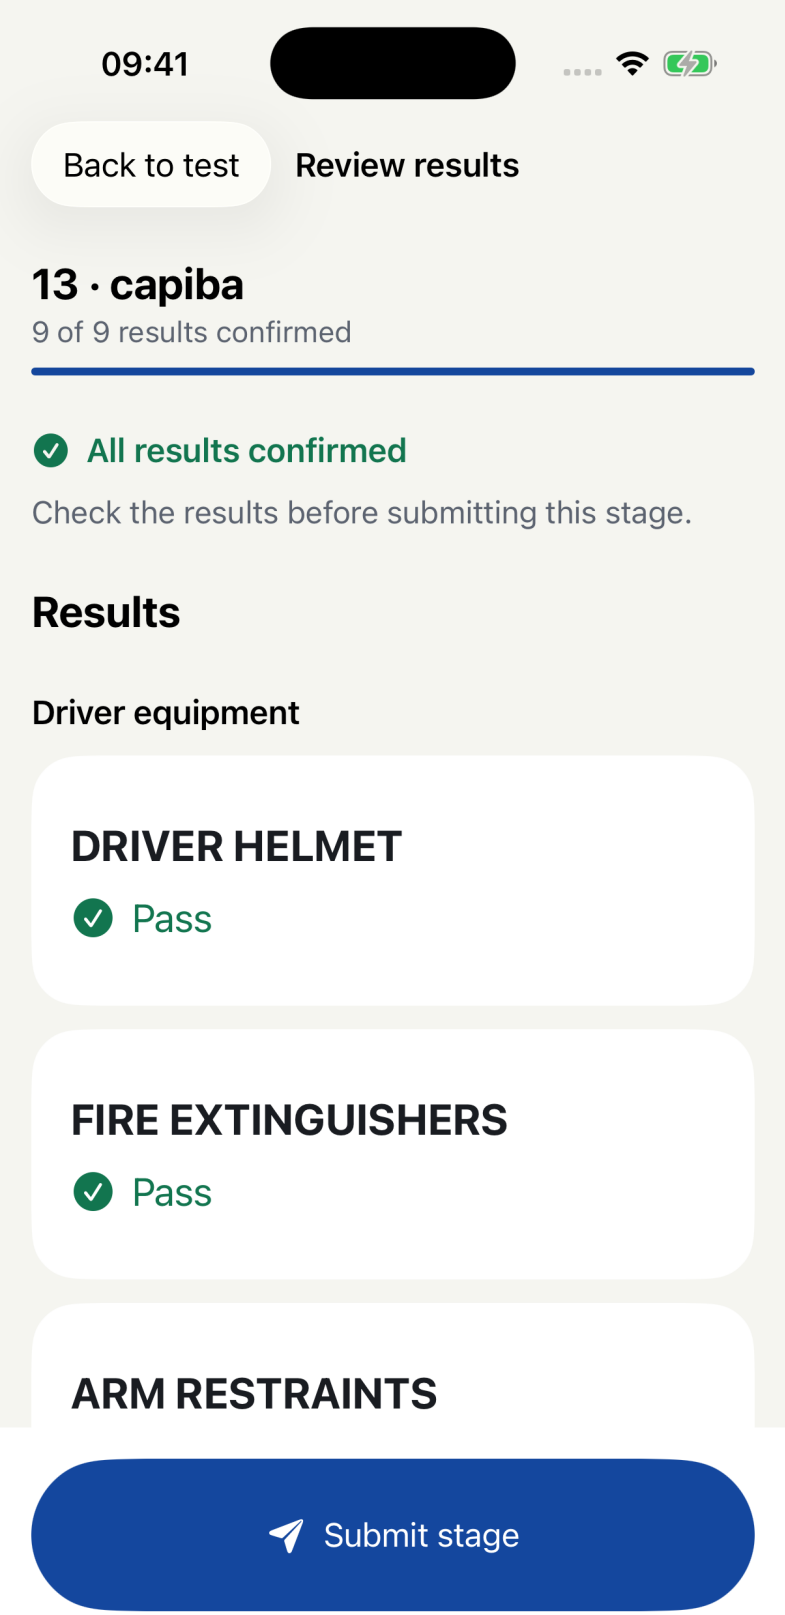

Queue reveals and identifies SPARE PARTS while Driver equipment remains collapsed (`queue-drawer -inspection-queue-position`).

PR #88: queue and review continuity

Review cards

02-review-cards.png | 4d3a014 (outcome follow-up: 9101e7e)

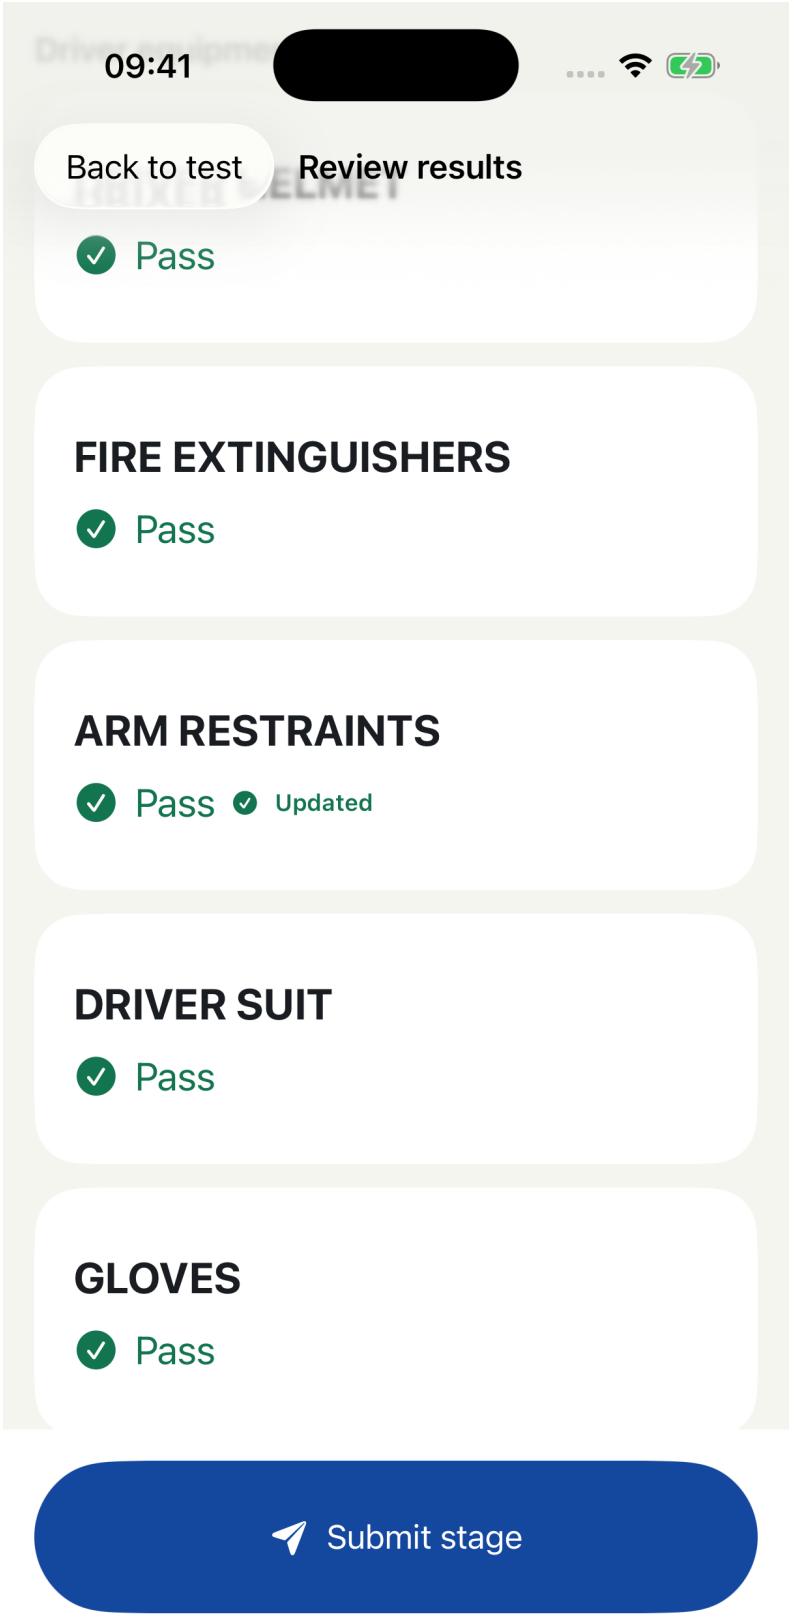

Larger result labels and full-card correction targets (`review`).

PR #88: queue and review continuity

Restored review

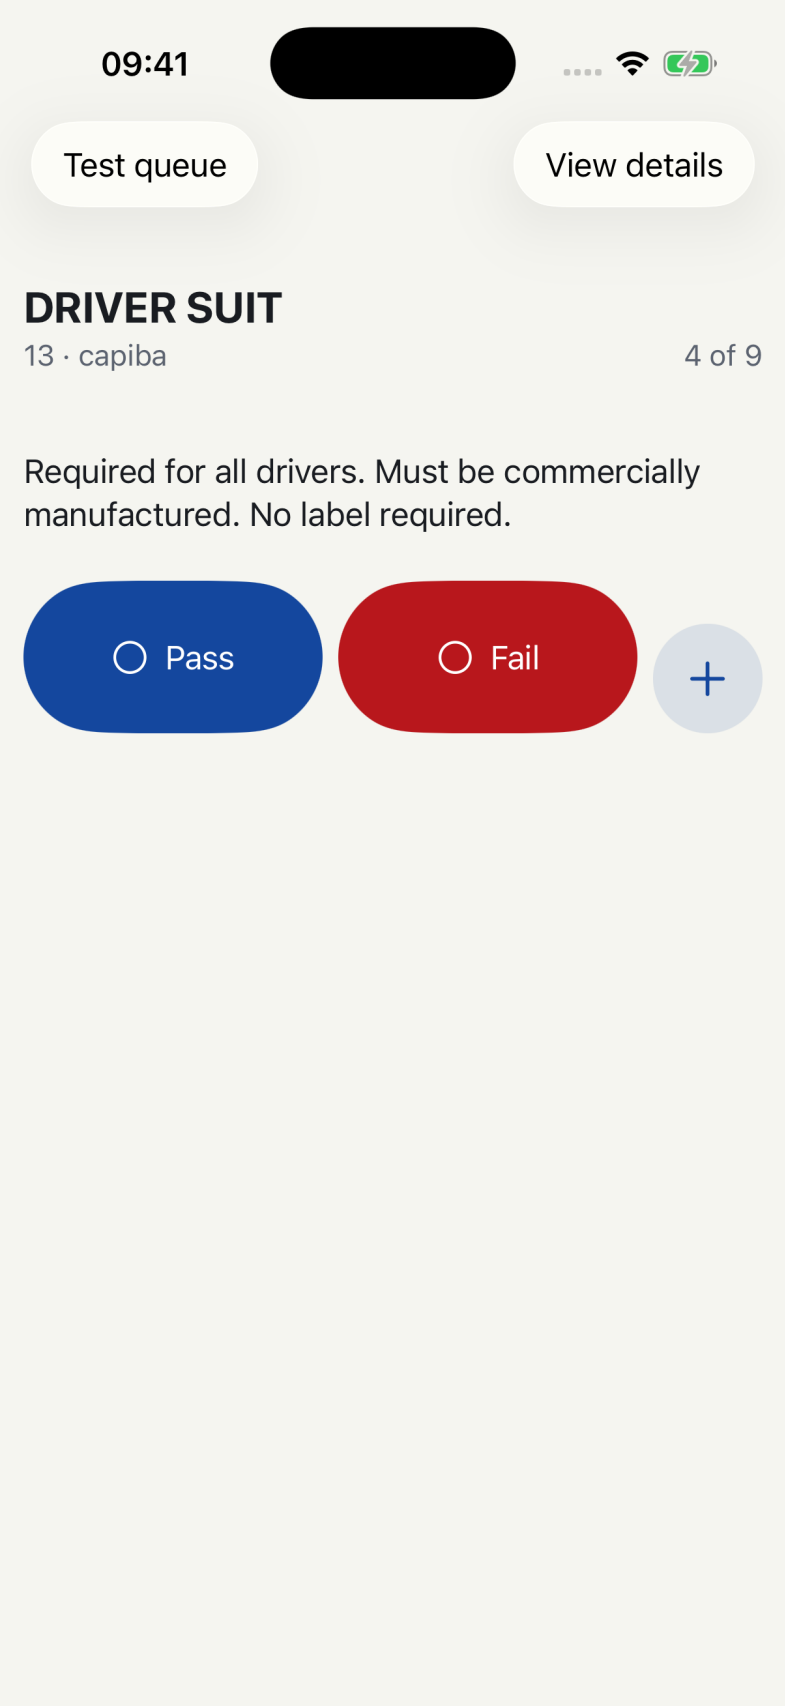

03-restored-review.png | 4d3a014 (outcome follow-up: 9101e7e)

Actual scroll restoration at 340 points with the corrected ARM RESTRAINTS result identified (`review-inspection-review-position`).

Next test

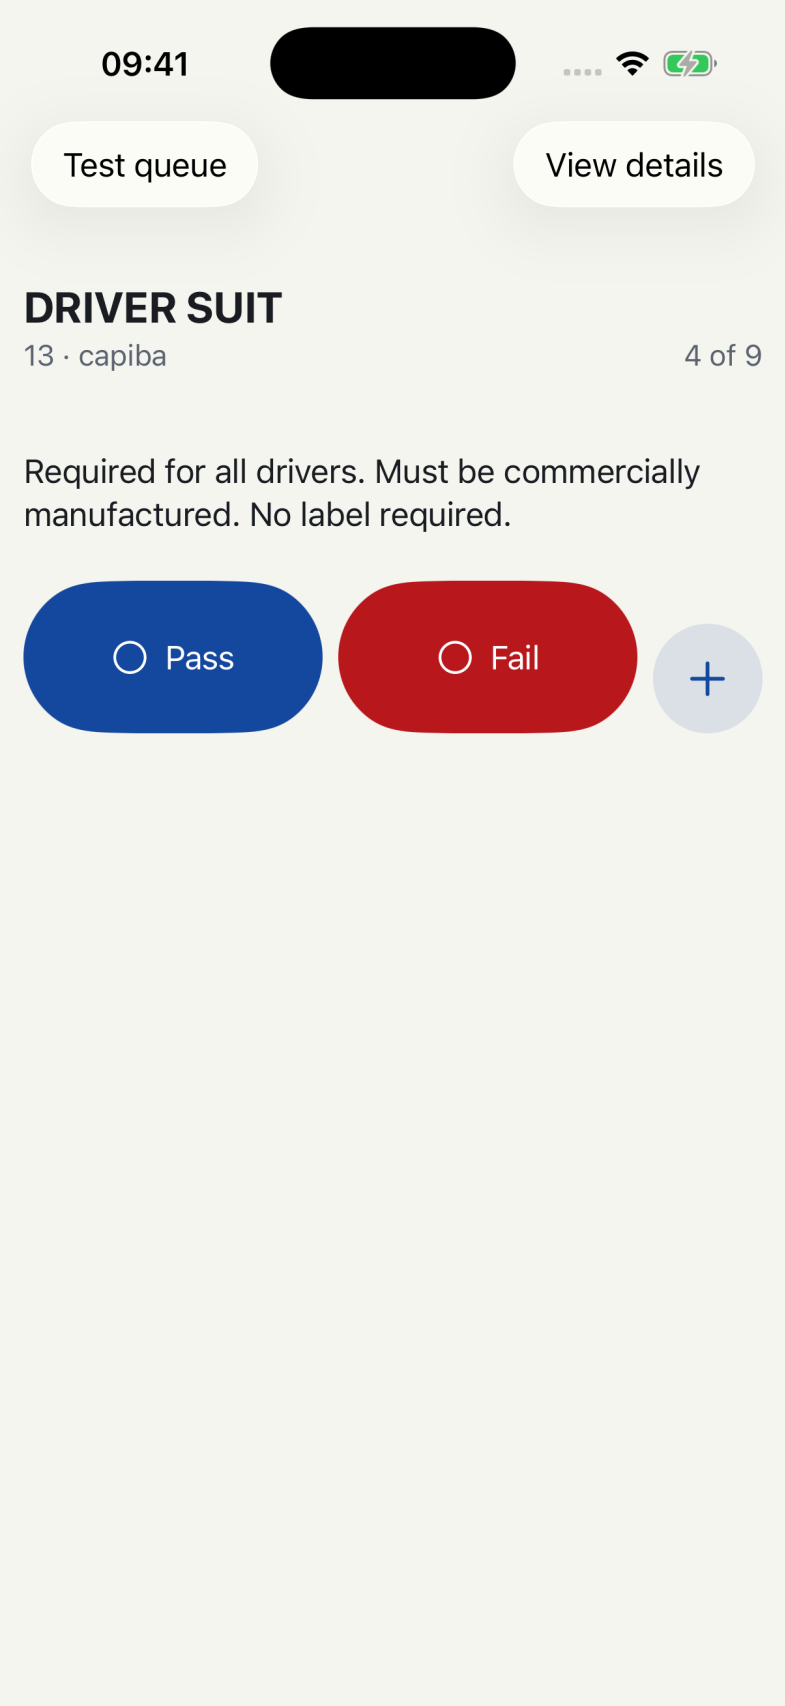

01-next-test.png | 5c736e4 (toolbar fix: 07788fe)

Actual save-and-advance fixture opens DRIVER SUIT, 4 of 9.

Reduced motion

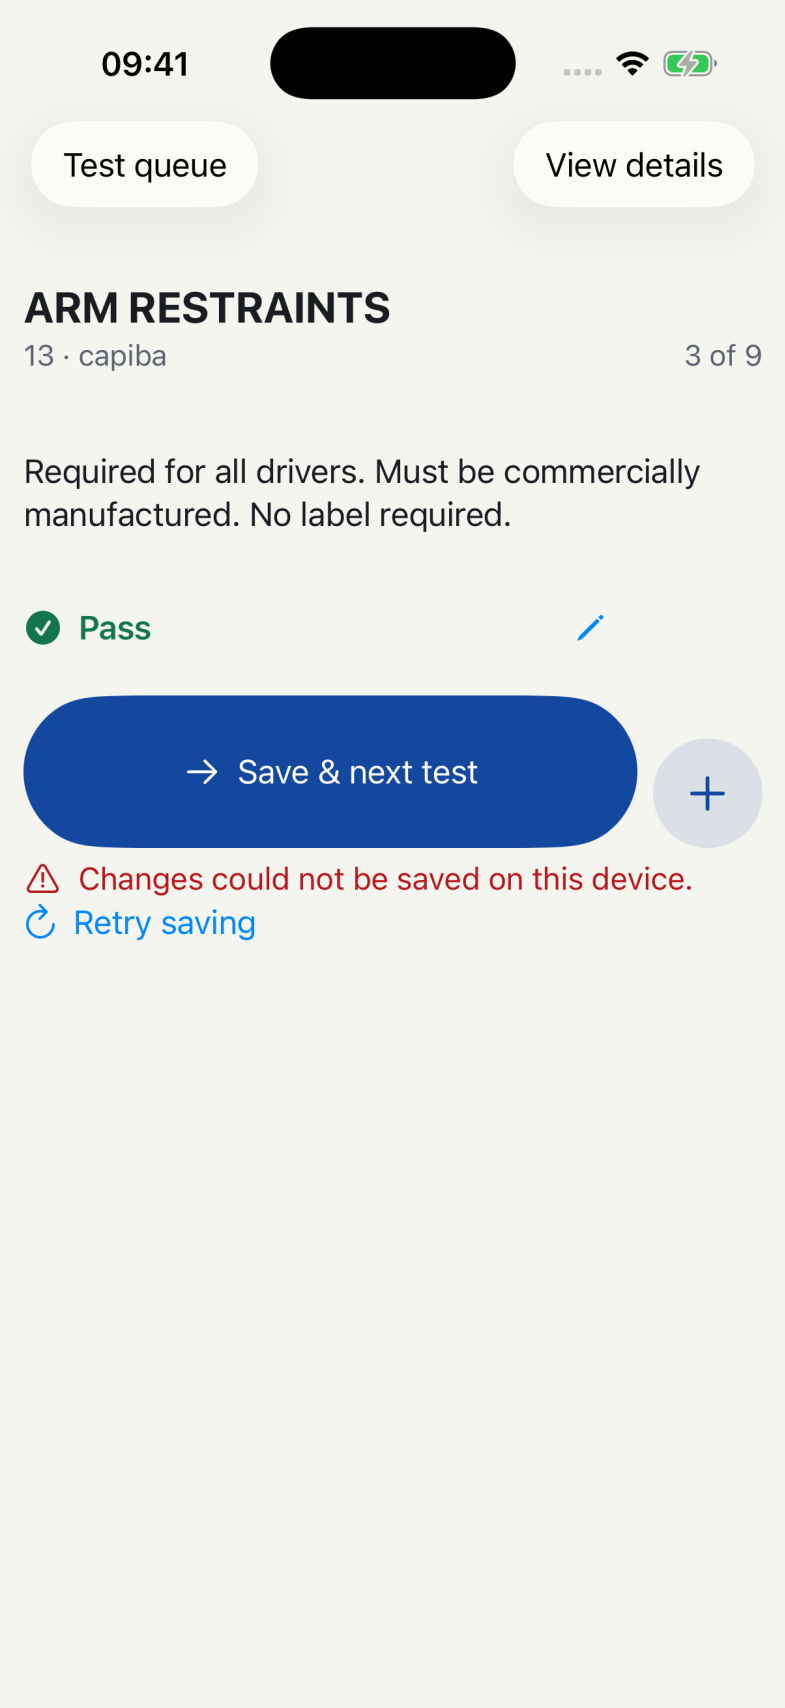

02-reduced-motion.png | 5c736e4 (toolbar fix: 07788fe)

Same save-and-advance sequence with the DEBUG Reduce Motion override; the transition is disabled.

Failed save

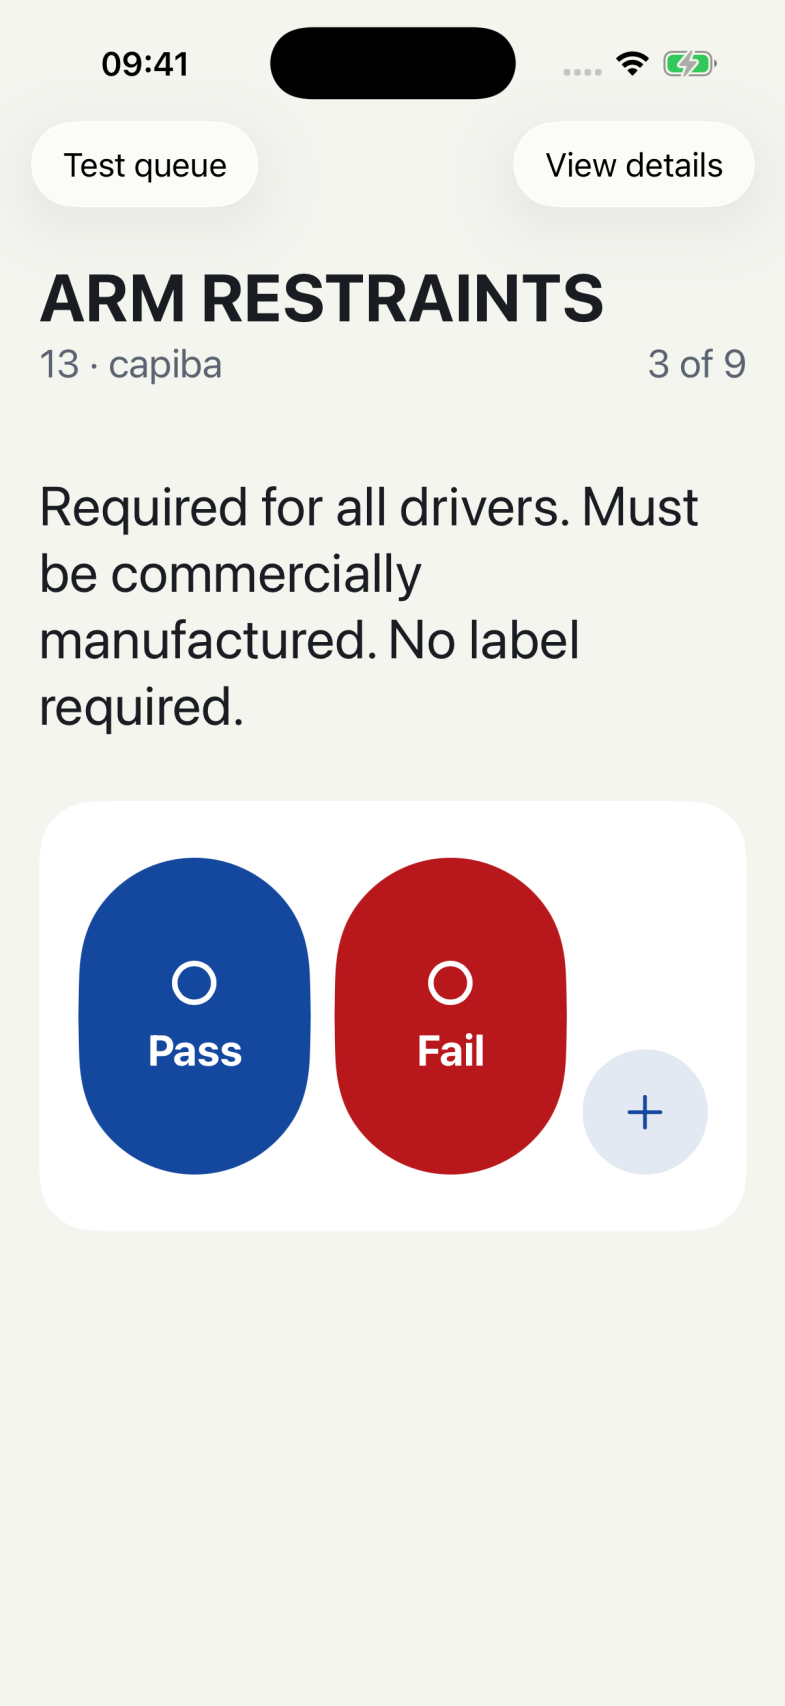

03-failed-save.png | 5c736e4 (toolbar fix: 07788fe)

Injected local write failure keeps ARM RESTRAINTS, 3 of 9, with Retry saving.

Focus

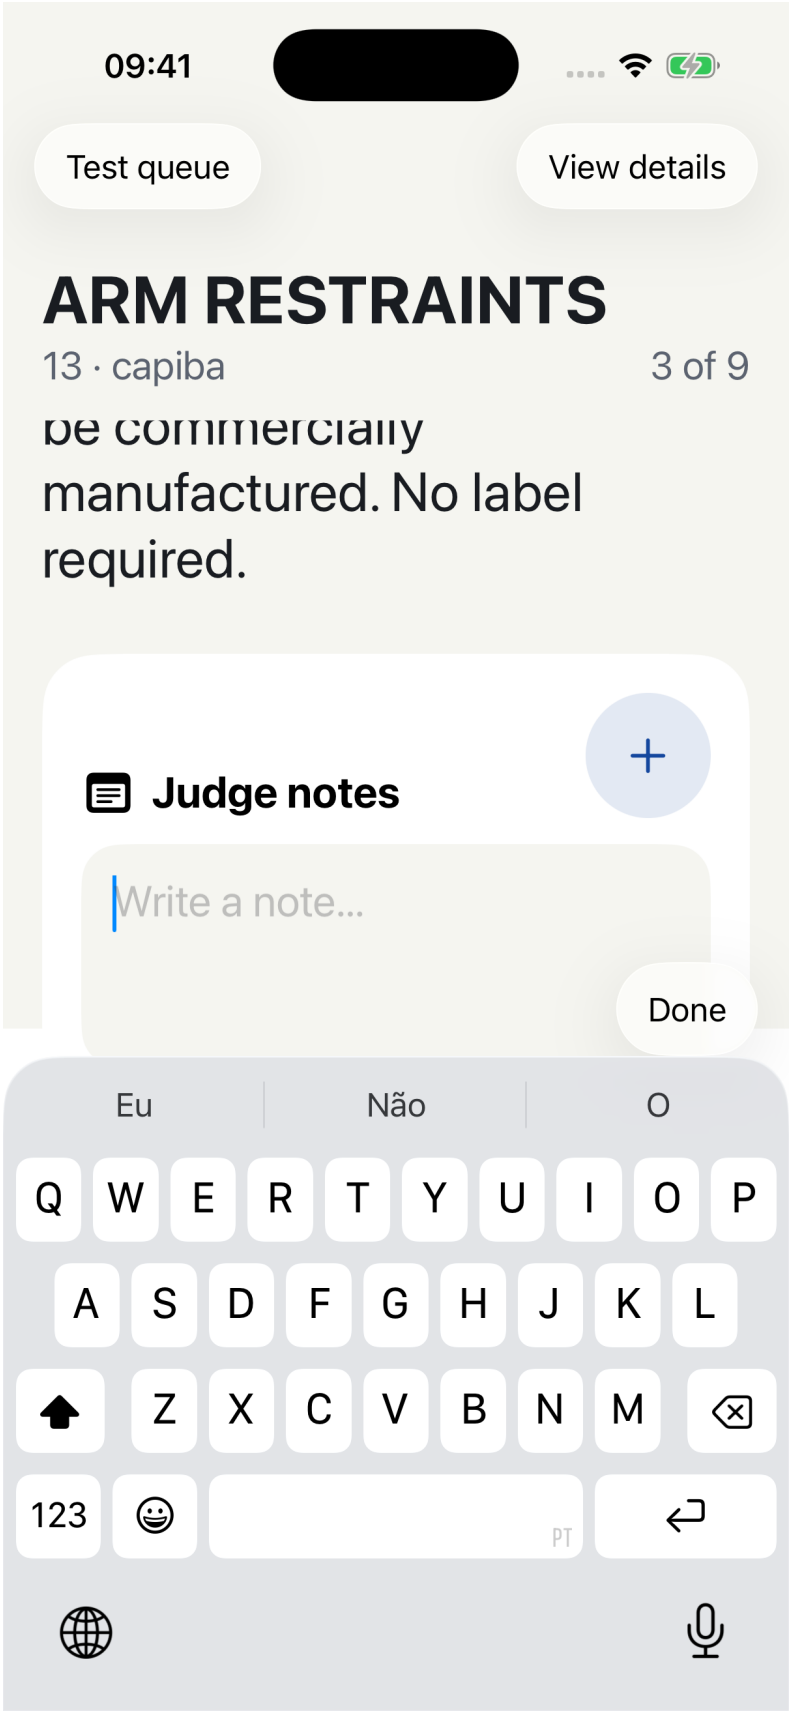

01-focus.png | 4e14814 (local combined source)

Combined focused test with larger title, criteria and rounded outcome controls.

Notes

02-notes.png | 4e14814 (local combined source)

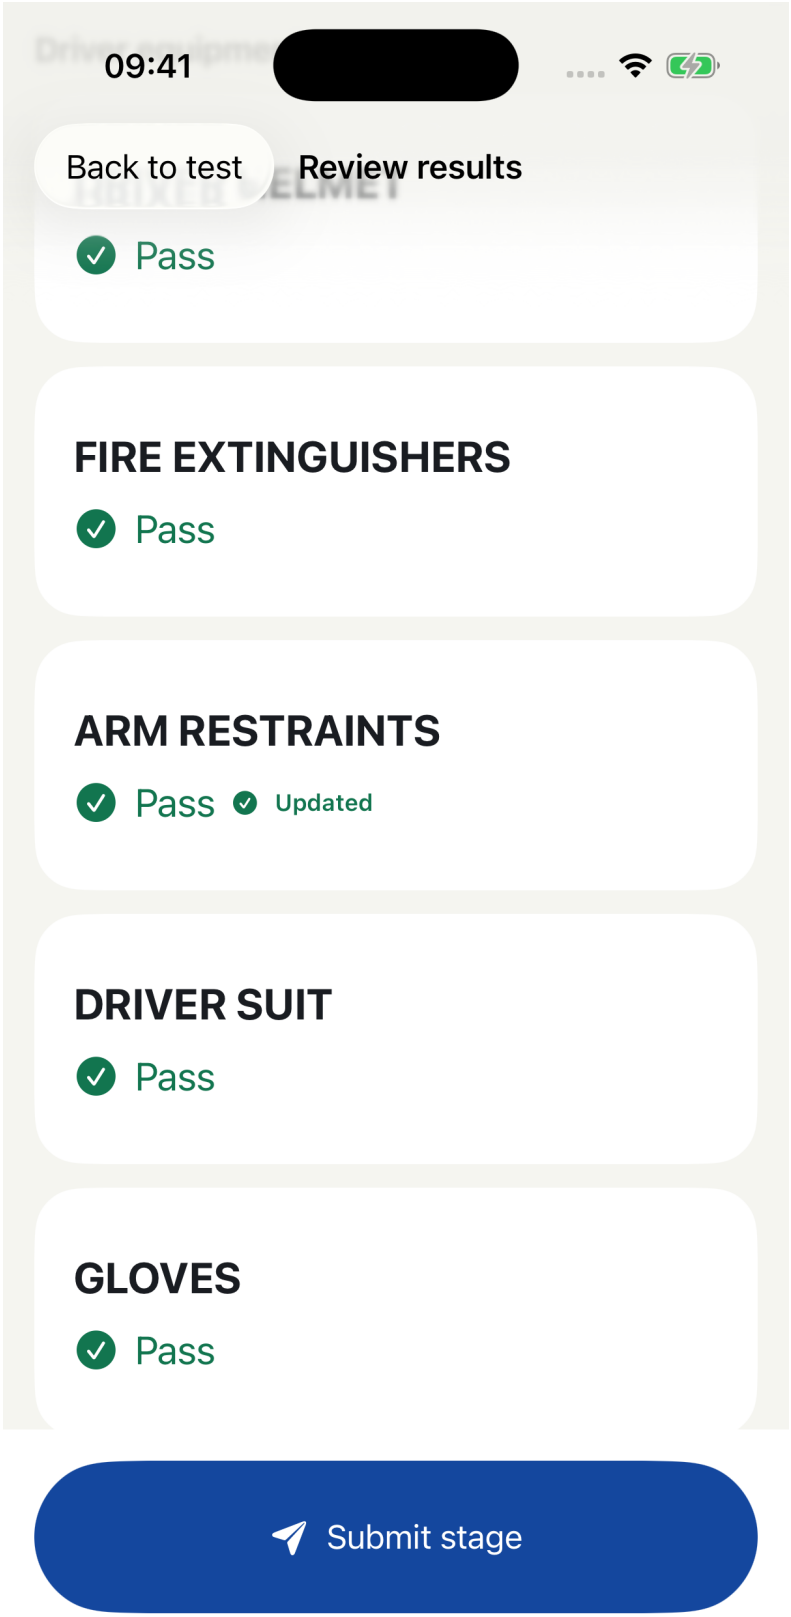

Add note expanded in place with keyboard and Done; test context remains visible.

Combined preview: all three PRs

Review

03-review.png | 4e14814 (local combined source)

Restored review position and Updated marker with larger correction cards.

Validation and review

PRs and source

All target simplified-ui-redesign at ceef990. #87: 2e86799; #88: 4d3a014 + 9101e7e; #89: 5c736e4 + 07788fe. Combined local preview: 4e14814. GitHub PRs remain drafts and unmerged.

Automated checks

Full scheme: 143 tests / 146 executed cases, zero failures or skips. Final result: /tmp/FSAE-ui-combined-final.xcresult. Focused PR checks: 20 input/evidence, 19 navigation/status, 17 coordinator/persistence tests passed.

Build and visual checks

Debug and Release simulator builds passed after the keyboard-toolbar fix. XcodeBuildMCP, Xcode 26.2, dedicated iPhone 17 Pro / iOS 26.2 simulator, retained DerivedData. Every new PNG passed boot-screen rejection and visual inspection.

Integration finding

An extra stacking container suppressed keyboard Done in the combined app. PR #89 now uses a transparent group; page 50 shows the restored control. Only milestone checklist lines conflicted while combining branches; completed entries were retained.

Evidence interpretation

DEBUG fixtures isolate captures from judge data. The stored photo thumbnail is real image data. Earlier input screenshots are checkpoints, not the final appearance. PR #89 independent captures retain the base input layout; the combined preview includes PR #87.

Motion and remaining manual review

See Snapshots/09-combined-preview/04-confirmed-transition.mp4 in the vault for the final actual transition recording. Static images establish end states. Native touch gestures, VoiceOver, compact-device ergonomics, outdoor use and physical camera capture remain manual checks.

Delivery and scope

Open docs/simplified-ui-vault as an Obsidian vault. Plan.canvas remains vertical only and links the PR/evidence record. Improvements 11-15 remain deferred. Session switching and concurrency work are outside this scope.
